# ZERO TRUST BEGINS WITH SECURE ACCESS TO ALL APPS

## ABOUT GBM/UCMC:

With more than 30 years of experience, 7 offices and over 1500 employees across the region - Gulf Business Machines (GBM) is a leading end-to-end digital solutions provider, offering the region's broadest portfolio, including industry-leading digital infrastructure, digital business solutions, security and services.

## WHAT WE OFFER

Security presents many of today's biggest organizational challenges. GBM understands the risks you face. Our comprehensive framework of services and solutions, integrating technologies from global security leaders, can help you implement industry best-practices and face every threat with confidence.

UCMC's APM Powered By BIG-IP® Access Policy Manager® (APM) is a flexible, high-performance, centralized access management and security solution that delivers contextual, unified global access to your applications and network as well as to the Internet. It converges and consolidates remote, LAN, and web access and wireless access within a single management interface, while also enabling the quick creation of easy-to-manage, context-based access policies. As a result, BIG-IP APM helps you free up valuable IT resources, ensure the security of your applications and network, and scale quickly and cost-effectively.

### See what customers are saying:

*The decision to work with F5 was clear cut, They were the only solution provider with extensive application expertise, as well as the full range of security and cloud solutions that we needed to move the needle for our digital transformation and customer service requirements."*

*– Alan Harper, Head of Infrastructure, Shawbrook Bank*

# Why F5 APP Services on Microsoft Azure?

**Whether you want to deploy F5 application services in front of individual or multiple apps, you can:**

- Simplify application migration to Azure.
- Secure Azure workloads against even the most sophisticated threats.
- Ensure simplified, trusted access to any application, including on-premises apps, through Azure Active Directory.
- Implement multi-cloud service consistency across your entire application portfolio

## **Operate hybrid seamlessly**

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## **Build on your terms**

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## **Trust your cloud**

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
