INTEGRATED HSE MANAGEMENT SOFTWARE

OVERVIEW

NuaraSAFE streamlines the recording and management of PAKATs, incidents, investigations as well as safety and quality audits by integrating and automating the workflows; thereby reducing processing time and potential for human error. This ensures adequate documentation, traceability and accountability at all times.

The ability to assign corrective and preventive actions while monitoring their completion in real-time increases transparency and allows for improved communication across the entire organisation. For assigned actions, evidence must be uploaded before it can be closed. This ensures effective measures are taken to rectify potential threats and decrease operational risks.

Thanks to the direct interface with incident reporters, a seamless flow of reporting, recording of findings, assigning and completion of actions, production of reports and learning from incident materials is ensured.

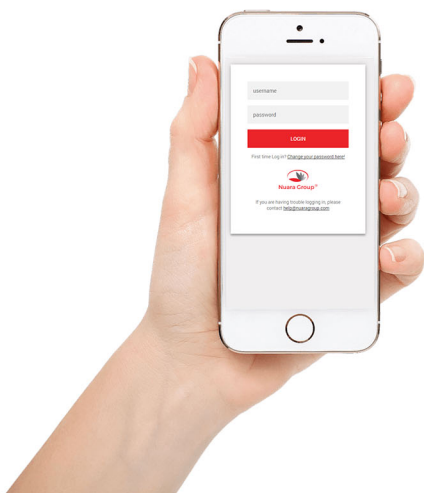

VALUE CREATION

NuaraSAFE is a web-based and fully integrated HSE Management Software that allows for easy and efficient reporting, tracking and management of incidents, audits and investigations.

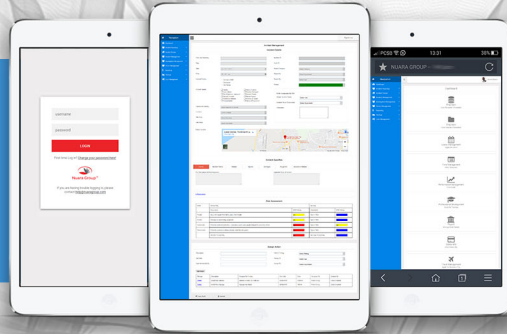

- ✔ RECORD INCIDENT FINDINGS
- ✔ UPLOAD PHOTO EVIDENCE
- ✔ GEO-TAG INCIDENT LOCATION
- ✔ CONDUCT RISK ASSESSMENT
- ✔ SEND ALERTS AND ESCALATIONS
- ✔ ASSIGN CORRECTIVE ACTIONS
- ✔ AUTO STAKEHOLDER NOTIFICATION
- ✔ CUSTOM REPORT GENERATION

KEY BENEFITS

- OPTIMISED FOR USE ON ALL MOBILE DEVICES
- CUSTOMISED ACCORDING TO CLIENT'S REQUIREMENTS
- ACCESSIBLE FROM ANYWHERE AT ANY TIME
- WEB - BASED WITH OPTION OF IN-HOUSE HOSTING
- RETAIN FULL OWNERSHIP AND CONTROL OF DATA
- CUSTOMISED ACCESS LEVELS ACCORDING TO JOB ROLE
- LOCAL CUSTOMER SUPPORT

**REPORT.
INVESTIGATE.

**INTERGRATED HSE
MANAGEMENT SOFTWARE**

KEY OBJECTIVES

SAFETY

Mitigate risks by effective handling of incidents, audits and investigations.

COMPLIANCE

Ensure compliance with guidelines and regulatory requirements.

DOCUMENTATION

Complete documentation is readily available and accessible.

REPORTING

Comprehensive reports with graphs, charts and heatmaps.

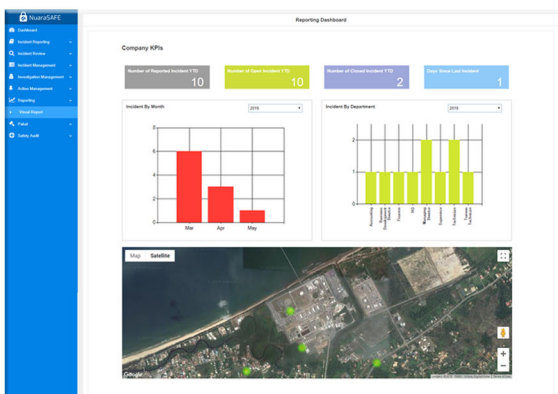

ANALYSIS

Analyse HSE trends and easily share with stakeholders.

MODULE OVERVIEW

VISUAL REPORTING

NuaraSAFE HSE Management Software comes with comprehensive reporting functionalities. The reporting dashboard shows all key performance indicators such as the number of reported incidents year to date (YTD), the number of near misses year to date (YTD), the percentage increase in incidents year on year (YoY) and is fully customisable based on the client's requirements.

The Visual Report includes charts showing the number of incidents per year, by department, the top 5 vulnerabilities by location as well as an incident heat map to identify your highest risk areas. NuaraSAFE supports your HSE Department with capturing the right information and easily creating reports that allow decision makers to make better decisions to ensure lower operational risks and to maintain highest health, environmental and safety standards.
