INDUSTRIAL

IoW Smart Radio

THE FUTURE OF FRONTLINE COLLABORATION

The New Standard in Industrial Communication

weavix™ revolutionizes digital communication for the frontline workforce. As the first to provide multimedia digital communication capabilities to every worker in the field, weavix™ is the premier tool to connect your entire workforce. Without third-party applications, your crews can communicate and work together instantly from anywhere in your facility. We are weavix™, and we are the **Internet of Workers™ (IoW)** platform.

Don't Let Voice-Only Comms Tie your Crews Down

If you're happy with limited opportunities, language barriers and missed communications keeping your workers from performing at their best, then stick with your dumb legacy devices. But if you want more out of your industrial radio system, you want weavix™.

PT3: Pushing the Limits 3 Ways

Communication and collaboration are vital to your crews' overall performance and limiting them to only push-to-talk affects your whole business. Combining push-to-talk, push-to-picture and push-to-video communication, **PT3** puts the most advanced capabilities at your frontline's fingertips. Our walt™ smart radios elevate your crews and shows you everything your legacy radio systems have been keeping you from.

PUSH-TO	**UNCOMPROMISED**	**UNLIMITED**	**INDIVIDUALIZED**
Talk, Text & Video	**Device Management**	**Comms Channels**	**Device Configuration**

Multimedia communications, along with the best-in-class features, empower your entire workforce to get the job done **safer, smarter, faster**. weavix™ does it all in one platform, with capabilities that are built specifically for the field. This is the new standard of industrial **com**munication.

Industry-Leading Features:

- In-line Dictation
- Language Translation
- Searchable Directory
- Individual Radio Locating
- 1-1 & Group Communications
- Man-Down Alert
- GMRS Radio Backup

Complete Collaboration: We're Not All Talk

No more retrofitting current office platforms to bring messaging into the field with questionable results. weavix™ is the first communication platform built specifically for the field to do just that. We've simplified 1-1 and group messaging for the frontline workforce, without the hassle of an unreliable connection.

**Push-to-Talk is Only the Beginning.
Digital Communication Remastered.**

Forms & Integrations

Build, manage and integrate custom workflows and forms to streamline and automate processes throughout your enterprise. With weavix™, you can easily collect the information you need to solve complex problems, and then sync it into the systems you're already using, all from one platform. Spend less time on repetitive tasks, and more time on keeping your enterprise productive and profitable with optimizations brought to you by weavix™.

Automate Workflows	Build Custom Forms	Keep your Current Systems
Enhance your day-to-day procedures and scale your business with ease using the weavix™ Rules Engine.	Using our extensive library of fields and features, create forms to help you overcome nearly any scenario.	weavix™ integrates with the business systems that are already working for your enterprise.
From our platform, easily create automations based on any number of factors, including: ⊘ **Location** ⊘ **Form Submissions** ⊘ **Worker Statuses,** to remove inefficiencies and manual workflows.	The weavix™ Form Builder collects the right information from the right people to solve any operational issue. Analyze your results and discover digital solutions that will optimize your enterprise quickly and easily.	You can review and edit your workflows and forms within the platform, but our system can connect with hundreds of third-party options for various business functions. weavix™ plays nice with other systems to centralize your information.

Overcome Language Barriers Instantly

Language is one of the largest and most complex barriers to productivity that industrial facilities face. It's impossible to optimize your workforce and truly connect every worker in your facility with language restricting them from communicating. Automatically translate between languages directly from your walt™ smart radio.

Industry-Ready Smart Radios

weavix™ devices are built to work as hard as your workers do, that's why we created walt™. With a rugged, comfortable design, walt™ maintains the shape and size of legacy radios, meaning he can fit in with any crew without issue, all at no cost to you. walt™ is purpose-built and designed to last in any haz loc environment.
With innovation and durability at the forefront of our design, even the smallest details were considered:

- Scratch & Shatter Resistant Screens
- 64 Gigabytes of Memory
- Glove-Friendly Buttons
- Compact Size
- Durable Casing for the Toughest Work Environments

Wear Gloves Wear walt™

Built for the Most Rugged Facilities

Customization

Each walt™ can be customized to work with your facility regulations and individual preferences.

- 36 Click-Fast Mounting Options
- Automatic Volume Adjustment based on Ambient Noise
- Feature Limitations on individual, group or facility-wide devices

Certifications & Safety Ratings

- Class 1 Div. 2
- IP68 Standard
  Withstands dust, dirt and water
- ATEX Zone 0, 1, 2
- UL Certified

MOBILE APP

Take weavix™ On-the-Go

Available on Android and IOS, the weavix™ mobile app lets you take the power of weavix™ with you wherever you go. We've made it convenient to collaborate with your frontline from anywhere using any mobile device.

WEB CONSOLE

Collaborate from your Office

weavix™ bridges the gap between the deskless and deskbound workforces for collaboration that pushes your enterprise farther. Using the web console, you can work alongside your frontline crews as you normally would, just from the comfort of your office.

Find & Connect with Workers in the Platform

With a configurable directory of every user, weavix™ allows you and your crews to invite others to connect. Depending on your facility's configuration, you can invite workers from inside and out of your organization to join and securely communicate. This makes managing and integrating multi-company labor into your workforce seamless and efficient.

To benefit your frontline workers, weavix™ is packed with worker-optimized features and guaranteed solutions for a truly collaborative workforce.

The Next Step in Industrial Communications

WHERE'S walt™?

One Platform to Find them All

Your walt™ goes with you anywhere throughout your facility, and that means you can leave it anywhere too. weavix™ makes managing your devices easier than ever. Locate and retrieve any walt™ smart radio in your facility using our online console or mobile application. No matter where you left it, walt™ won't be lost for long.

Repairs, Replacements, and More. Because weCare™

Under our managed service plan, weavix™ offers the coverage you need that legacy radio providers simply don't offer. At no additional cost, weCare™ offers infrastructure coverage assurance to any weavix™ deployed devices on your frontline.

Repair and Replace your Devices

weavix™ takes care of repairing or replacing any of your broken devices on your behalf. Instead of simply buying new radios as you need them, weCare™ saves you time, effort and resources. As your enterprise continues growing, weavix™ ensures everyone has a walt™.

Upgrade your Crews

Ensure you and your frontline always has the latest weavix™ devices and infrastructure. As our devices evolve with the needs of the frontline workforce, you can rest easy knowing you always have the most up-to-date equipment.

Harness the Power of CBRS

Citizens Broadband Radio Services (CBRS) is a shared wireless spectrum used for building and enhancing private 4 & 5G LTE networks. Private LTE gives your workers a more secure, reliable connection throughout your facility compared to Wi-Fi and Public LTE. That's why, when you choose weavix™ for your communication network, we deploy PLTE designed to fit your facility's specifications. Along with weCare™, we guarantee complete coverage throughout your entire facility for every worker.

While PLTE is our go-to for digital network capabilities, we're not exclusive to it. weavix™ seamlessly integrates with any existing digital network, including Wi-Fi and Public LTE, meaning walt™ can still enhance your frontline without replacing your infrastructure. With weavix™ on your frontline, we connect every worker, no matter the network.

Guaranteed Coverage

Your communications are only as good as your network. Using a weavix™ deployed PLTE network, keep your workers connected 24/7 from anywhere in your facility and downtime to a minimum with multiple redundancies. That's our weCare™ promise.

Staying Connected Between Analog and Digital - RoIP

Analog radio systems aren't out of the question for weavix™ either. Using Radio over IP (RoIP), weavix™ connects your workers, even if your facility runs on a LMR system. If you've just enhanced your current LMR system or aren't ready to make the switch, RoIP gives you the opportunity to experience the digital communication benefits and features weavix™ offers the frontline while keeping open lines of communication between digital and analog devices.

Keep Communications Up if your Network Goes Down

In case your network crashes, weavix™ doesn't leave your crews without a backup plan. GMRS Radio allows your workers to continue communicating even without a network. weavix™ maintains a connection between other walt™ smart radios in your immediate area, ranging between 1.5- and 5-mile radius, depending on the facility infrastructure. While your network is inactive, all peer-to-peer communications are encrypted, ensuring your communications are only available to those in your system. Once your network is restored, all communications that happened during this time are saved in the platform.
Wherever Industrial Communication Happens

weavix™ connects workers and enhances communication and collaboration out in the field wherever your crews are.

Leading in industrial communication, field crews and facilities rely on weavix™ to deliver reliable communication throughout the entire facility under our managed service plan.

From a simple text to your foreman to completing tasks faster without worrying about language barriers, weavix™ makes it possible. Our best-in-class features built into one powerful walt™ smart radio gives your frontline the competitive edge to maximize productivity at every level of your facility. With unlimited global range, digital communications and a secure, private network connection, field workers have everything they need to get the job done effectively as a crew.

Made Possible with the Internet of Workers™

The **Internet of Workers™** is uniquely designed for the frontline workforce, offering a competitive advantage for those out in the field. Just like how IoT builds new technology to digitally transform machines, **IoW** does the same but at the benefit of the human worker.

Rather than an "automation first" concentration, IoW engages the workforce with an entire ecosystem of digital connectivity. Enhanced productivity, collaboration and safety within the workplace is made possible only with the weavix™ **IoW** platform.
