TEAM PLANNER

A MODERN TOOL FOR RESOURCE MANAGEMENT

Team Planner is Projectum's Resource Management tool. It enables Project Managers to plan and control resource requests while Line Managers get a complete overview of their team and allocations. Team Planner provides management with an outline of the capacity situation through relevant out-of-the-box dashboards within the time frame of your choice.

CREATE PROJECT

1

Create and keep track of all your projects with a nice overview. Manage and search for specific projects with the Project Picker feature from the menu line. When your project is created you can start requesting your resource.
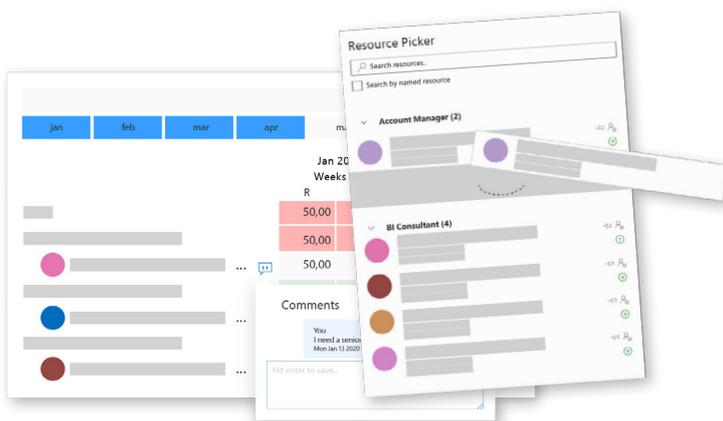

REQUEST & ALLOCATE RESOURCES

2

Easily request and allocate your resources through the Resource Picker by choosing the desired discipline or resource. Use the drag-and-drop function to add the resource or click on the add icon. Use the comment feature to secure transparent and aligned communication between Resource and Line Managers.

STAY ON TRACK WITH REPORTING

3

The direct integration to Power BI makes it possible for top management to follow the development of the business in real time. Reports can be customized to the business' needs, thus making it easy for everybody to stay on track according to business goals and strategy.
