

SAP Modernization on Azure

The trusted path to enterprise-ready innovation in the cloud – bringing the intelligence, security, and reliability of Azure to your SAP applications

Migrating from an on-premises SAP environment to SAP S/4HANA on Microsoft® Azure® can appear intimidating, particularly for organizations that have little experience with cloud infrastructure. There's good reason for caution: shifting mission-critical workloads without proper planning can disrupt your business.

Fortunately, a suite of powerful tools from Azure, coupled with proven SAP and Azure expertise from Rackspace Technology, can help you complete a migration efficiently and with minimal disruption.

These capabilities give you the benefits of SAP S/4HANA's transactional and analytical capabilities, plus access to a rich ecosystem of cloud-based applications and development tools on Azure.

Tap into more than 100 Azure services, access SAP Cloud Platform, apply intelligent analytics and integrate with Microsoft 365, Teams, Power Apps, and Power BI to discover insights that drive new customer experiences.

Experts Dedicated to Your Success

As the leading multicloud specialist with extensive SAP and Azure expertise, Rackspace Technology accelerates the value you get out of your SAP ERP applications and makes Rackspace a trusted partner that offers management services built on industry-leading best practices.

With a global presence, Rackspace Technology provides customers with access to a large pool of technology talent and delivers functional and technical capabilities to continuously deliver on customer-specific business objectives.

Benefits

Better economics: Pay for only the compute, storage and other resources you use, savings up to 40% compared to running SAP systems on premises.

Focus on your business: Rackspace Technology will manage your SAP applications so you can focus on creating innovative and differentiated customer experiences.

Reliability: On SAP-certified Azure infrastructure, your SAP systems will have increased global service availability through automations around recovery from infrastructure or service disruptions and dynamic scaling to meet demand.

Data-driven decisions: Accelerate your business transformation using emerging technologies including artificial intelligence, machine learning and IoT. Microsoft services such as Azure Data Lake and Power BI give you the insights you need to make intelligent business decisions for your critical ERP scenarios.

Enhanced manufacturing operations: Improving manufacturing processes with solutions leveraging IoT and ERP data for preventative maintenance and remote operation applications.

- SAP-certified HANA operations services
- SAP-certified hosting services
- SAP-certified Partner Center of Expertise
- SAP Silver Partner

"I had never worked with Rackspace and time was short. We had 70 days to migrate our SAP environment. Other providers told us 'no' but Rackspace helped us rethink our approach. Their application expertise was refreshing."

Jason Friedlander :: CTO, Coinstar

Fanatical Experience™

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

Key Features

Professional Consulting Services: Rackspace Technology helps customers select the optimum managed solution and service models to meet their business and integration needs.

Professional Consulting Services include:

- Assessments
- System implementation and integration
- Migration services
- Data services
- Application development

Managed Application Services: Rackspace Technology managed services are designed to help your organization use smart, efficient ways to optimize and generate more value from your SAP ERP application portfolio. Rackspace Technology systems and application integration services, including SAP PI/PO, EDI and MuleSoft® integration and multicloud connectivity are designed to deliver value throughout every phase of the application portfolio lifecycle and help you realize an increased level of interoperability and better return on investment through ongoing maintenance and operations.

Managed Application Services include:

- Advanced configuration and optimization
- SAP Basis services
- Administration, monitoring and maintenance
- Data services

Take the Next Step

Let's talk about how Rackspace Application Services for SAP on Azure helps you achieve your goals.
