The Challenge

Employees are challenged everyday with a growing imbalance between work and life, leading to the potential of increased burnout with a decrease in workplace wellbeing. We can help you to digitally reimagine the employee experience to enhance the way your organsiation works on a daily basis. The Microsoft Viva platform, built and accessed through Microsoft Teams, will help your employees to do their best and to thrive in the new normal.

Akari

What is Microsoft Viva and how does it <mark>help</mark>?

Microsoft Viva enables your organisation to create a central hub with your employees at the heart of it. . Powered by Microsoft 365 and experienced through Microsoft Teams, it brings together communications, knowledge, learning, resources, and insights in the flow of work. There are various different modules within Viva, the key ones covered will be:

- **Connections** - *Microsoft Viva Connections is your gateway to a modern employee experience designed to keep everyone engaged and informed. Viva Connections gives everyone a personalized destination where you'll discover relevant news, conversations, and the tools they need to succeed.*

- **Insights** - *helps you work smarter and thrive, with personalised reminders, such as prioritizing time for focused work and recommending breaks. It also warns managers if their team is at risk of burnout.*

- **Learning** - *is platform for employees to complete different training and view helpful content for them. In the Viva Learning "My Learning view," you'll find content that's been assigned to you, along with a curated list from a variety of sources.*

- **Topics** - *uses AI to automatically search for and identify topics in your organisation. When you come across an unfamiliar topic or acronym, just hover over the word, and a topic card pops up providing additional context.*

The Solution

Not only will we help you explore the capabilities of Microsoft Viva, but we will get your organisation ready by fully understanding your environment and ensuring we follow & implement best practices throughout.

We will help you get the most out of your Microsoft 365 investment to better improve efficiency and productivity within your organisation. You will also work with one of our Change experts who will deliver hands on training and show you to get the most out of Microsoft Viva, along with a walk-through guide and take-aways to ensure there is training available that is accessible to all.

We'll help you tackle the most common challenges such as:

✓ **Poor employee wellbeing due to stress and heavy workload**

✓ **Lack of communication between employers and employees**

✓ **Time consuming & manual process of sharing out news and important information organization throughout the entire organisation**
