

Nimbus Cloud Aided Dispatch

Boost your PSAP's performance with an efficient and cost-effective system that allows for remote dispatch and response **five ways...**

Improved situational awareness

leverage an unprecedented suite of location services, dynamic mapping layers and third-party intelligence to ensure a rapid and informed response, even under the most challenging conditions.

2.

Unlimited no cost integrations

Remove data silos and continue your workflow across applications with seamless data transfers from third-party technologies, at no extra cost.

3.

Update data and systems instantaneously

Focus on keeping operations running efficiently and effectively while receiving effortless, real-time reflection of GIS updates as soon as they are published to your Esri infrastructure.

4.

Multi-agency and cross-discipline support

Enable seamless coordination and communication of various public safety agencies for an efficient emergency response.

5.

Dynamic, spatial-based responses

Leverage authoritative Esri GIS response areas to quickly recommend resources close to incident location.
