NTT DATA

SAP Transformation Services

SAP Applications Designed, Built and Managed in Microsoft Azure

NTT DATA's SAP Transformation Services for Azure eliminate guesswork when migrating SAP applications to the cloud by providing predictable costs and timelines for design, deployment, management / support for your SAP applications in Azure.

NTT DATA's SAP Transformation Services for Azure

NTT DATA provides three tiers to choose from for migrating and managing your SAP applications in Azure. Each tier has a fixed startup cost and fixed monthly cost. We design, deploy and manage both your SAP applications and the underlying Azure infrastructure allowing you to focus on your core business.

Why clients use NTT DATA for their SAP Transformation in Azure

- Predictable costs and timelines

- You can focus on your business while we manage your SAP landscape and the underlying Azure infrastructure

- We provide the flexibility to customize your SAP landscape

Predictable Costs and Timelines

- Fixed startup costs

- Fixed time allotment for cloud build-out and SAP data migration

- Fixed monthly costs

Simplified Engagement

Cloud deployment and data migration

- Cloud design

- Cloud build-out

- SAP data migration

Designed and built for your business needs

Managed Service

- NTT DATA is your single-point-of-contact

- SAP application management and support

- Azure infrastructure management and support

Focus on your core business, not IT management

A world leader in rolled aluminum products needed to provide improved performance for its users across the globe while reducing IT operations costs. NTT DATA assessed and architected the SAP landscape solution to meet their business needs, resulting in simplified and flexible SAP infrastructure and operations.   - A world leader in rolled aluminum products
