You're covered

Managed Services for cloud and applications **covering all your support needs** from help desk to issue resolution and continuous improvement 24/7.

Lumen Azure Cloud Assessment and Migration Service

Migrate quickly to Azure Cloud

Discover & Assess

- Establish business goals and benefits and assess business & technical readiness
- Identify workloads, requirements and review current environments
- Set up Azure appliances to perform discovery on workloads, environments, dependencies
- Generate reports on findings and recommendations, migration plan, governance recommendations and estimates for target environment costs

Design & Build

- Analyze application characteristics & profiles and dependencies
- Design landing zones following best practices for security and governance and create required automation scripts
- Perform initial setup of environments including management groups, subscriptions, AD domains, network / VPN
- Document and validate designs and landing zones

Migration & Hypercare

- Confirmation of change control and operational readiness
- Execute migration and optimization plan of identified workloads
- QA test resulting migration validating expected results
- Knowledge transfer and Hypercare

Azure Managed Cloud Services

- Lumen Cloud Application Manager (CAM)
- Lumen Led Support
