# Pain free governance and accreditation management.

HEALTHCARE

OneVault's clinical governance, patient safety, and accreditation solutions empower hospital and healthcare providers to deliver better, safer clinical care while reducing their risk of clinical governance and accreditation non-compliance.

What is OneVault?

OneVault is an all-in-one cloud-based platform dedicated to clinical governance, patient safety and quality, and accreditation management. It's a modular system that allows you to select the modules specific to your needs. With solutions for risk, elearning, quality, surveying, auditing, document management, clinical indicators, project management and more, the more modules you choose, the more time and money you save.

Why customers choose OneVault.

OneVault empowers hospitals and healthcare providers with data-driven clinical governance and decision making, while improving patient safety and simplifying accreditation management.

- 70% cost saving on traditional clinical governance & accreditation management.
- Accreditation reporting in minutes, not months
- Real time clinical governance data for better, safer decision making.
- Greater transparency of your clinical governance, reducing risk and giving healthcare boards, and decision makers confidence in their governance.
- Boards are less susceptible to making errors due to out-of-date information
- Replace paper-based systems with automated smart technology
- A single platform / single source of governance truth
- Manage any number, type and mix of accreditation standards
- Access your work on the go with cloud-based technology
- Optimised for mobile use (laptop, tablet, phone)
- No fuss onboarding program for pain free transition
- Dedicated support team at the ready to support your administrators
