- ✓ Efficient
- ✓ Cost-Effective
- ✓ Job Done

Smarter SPLA, awarded European Commission- Seal of Excellence, turns the manual labor of SPLA reporting into an automatic and time-efficient task. Smarter SPLA provides a painless method of tracking usage, generating reports, and exporting reports to the billing system.

SMARTER SPLA

The SPLA Reporting Challenge?

Hosting providers have to submit monthly reports
Hosting providers find it difficult to create reports
Manual assessment is often required
Risk of inaccuracy
Accurate data interpretation / sorting
Cost implications for admin and not reporting correctly
There is a lack of easy to use reporting tools

About Smarter SPLA:

Service Provider Licensing Agreements come with some challenges. The common challenge with SPLA rests with hosting providers submitting inaccurate monthly reports. To combat this, TBSC developed a method to enable automated reporting from manual task through Smarter SPLA - Awarded European Commission – Seal of Excellence

End User Benefits:

- Reconciliation and optimization against licensing agreements
- Reduce manual processing and lower administration costs
- Improved accuracy in monthly SPLA reports due to reduce errors
- Validates against SKUs/Licensing models

Key Reports:

- SPLA Monthly report in LSP format – standard
- SPLA report Dashboard Overview – with customer splits by product and value
- Key Product ELP position, historic summary and current data
- Product breakdown by customer with variances
- Product value by customer with variances
- Product total with highlighted variances
- Other reports configurable by admin user, or customization by TBSC

Mature execution platform for software usage tracking	Robust SQL database scalable to 25million records per month
Rapid data loading & record deduplication	100% inventory methodology from RayVentory (agentless)
Links to assessment processes	Customizable user interface
Provides automated SPLA reports	Trackable data
