Our Clients

Q&A

What we do?

“Empower financial institutions to deliver an exceptional digital experience, to drive business growth and continuity”

dotConnect enables financial institutions with the technologies of today and tomorrow to better suit their target audience needs and expectations.

Our Solution

“Omni-channel digital banking as a service leveraging the power of artificial intelligence. Delivering an exceptional user experience, tailored to meet business processes via the workflow orchestrator”

Built from the ground up on the latest technologies in a microservice architecture in order to be lean and have the agility to innovate and change rapidly.

UK financial services landscape

Challenger banks

New digital only banks competing directly with the well established banks (HSBC, Barclays, Lloyds , NatWest, etc.)

GRPR

General Data protection Regulation that added more protection to the customer data and Personal identified informing (PII)

PSD2/Open Banking

EU Legislation implemented in 2019 that forced banks to publish their API's through Open banking and adhere to Strong customer authentication

FinTech

The changes in the landscape opened the door for FinTech to shine and compete and win opportunities from big players

Our vision

Experience

“You’ve got to start with the customer experience and work back toward the technology – not the other way around”

Steve Jobs

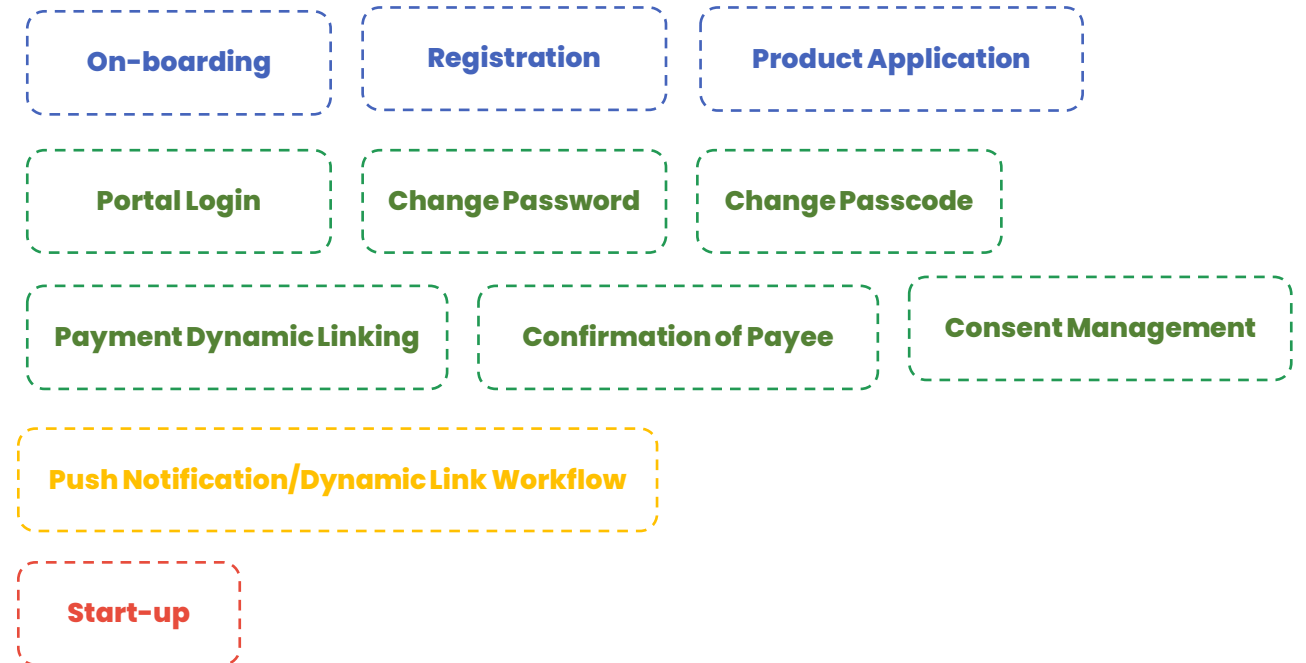

Workflow

“Flexible business process management so clients can tailor experiences”

Via a low/no code approach create business processes to tailor the customer experience to suit any financial institution. Allowing clients to evolve, adapt and deploy business processes rapidly.
