

# Data & Analytics Strategy: 5-Day Assessment

During our 5-Day data strategy assessment, our experts will work with you to set goals, identify strengths and weaknesses, design a target landscape based on Azure, create a roadmap and develop an initial cost estimate.

Data-driven business models, analysis of company performance, identification of weak points, process improvements and a deeper understanding of customers are some good reasons for the ever-evolving use of all business data as a model for success.

In our Data & Analytics Strategy Assessment, we look at the current state of your systems/data and the current environment, look at the strengths and weaknesses together and develop a target landscape and roadmap together. In doing so, we address your individual requirements and develop a modern, future-proof target landscape based on the appropriate services in Azure. We also create an initial cost indication.

## Agenda:

- Review & Discovery
- Status-Quo & Envisioning
- Gap Analysis & Target Picture
- Prioritization & Roadmap

## Add-Ons (optional):

- Proof of Concept "Migration Strategy"
- Workshops and trainings (Deep Dive Sessions)

## Conditions:

- Duration: approx. 5 days (spread over 2-3 weeks).
- Locations: Virtual via Microsoft Teams
- Conducted by: 2 experts
- Cost: 6000€ (net price plus VAT)

## Your benefit:

- Data architecture diagram incl. as-is and to-be analysis.
- Identifying individual requirements through interactive workshops
- Best practices
- Design of a modern target landscape based on Azure services
- Creation of a strategic roadmap.
