

Brings Plans Together.

Connect Plans 360 is an Enterprise Project and Portfolio Management Solutions that is designed and built for modern agile teams.

Organisations can use various Project tools to manage projects irrespective of the methodology (Agile, Waterfall or a combination) and retain oversight across all projects.

FEATURES

Agile Portfolio Management

Provides portfolio visibility, optimized reporting and collaboration among executives and development teams.

Project Finance Planning

Contributors to the Data Transfer Project believe portability and interoperability are central to innovation.

Resource Planning

Organisations need the ability to plan projects or initiatives or PI planning, to assess the impacts on resource allocations

Timesheets

Users can easily submit time spent on agile initiatives planned in Azure DevOps or JIRA and Project as well.

Cross Charge

Ability for organisations to capture and manage internal costs on projects or initiatives helps them to effectively assess initiatives

Supply Vs Demand

The ability for an organisation to meet demand will rely completely on the organisation to have capacity to deliver.
