

Why Quzara?

Quzara's CMMC Advisors help Department of Defense (DOD) prime and sub-contractors prepare for a successful Cybersecurity Maturity Model Certification (CMMC) audit.

Our approach uses an innovative Readiness Assessment Tool, technical solutions for navigating the CMMC framework, hands-on assistance with NIST SP 800-171 controls, pre-built documentation, and continuous assurance.

The CMMC Readiness Assessment Tool allows our advisors to identify gaps and remediation options for the required compliance level. Using this analysis, our CMMC team host a complimentary workshop to review a remediation roadmap, outlining prominent barriers in CMMC compliance.

After the initial assessment, our Advisory Services cover the entire compliance life cycle, helping SMBs avoid early mistakes that can be costly and time consuming.

Trusted Partners

Our Services

CMMC Readiness Assessment

Curated by our team of NIST SP 800-171 advisors, this no-cost, self-service assessment tool enables rapid remediation roadmapping based on CMMC levels 1 through 5.

Technical & Process Advisory

Our compliance advisors provide process and technical solutions for the CMMC framework and NIST SP 800-171. We also provide hands-on assistance to remediate technical controls.

CMMC Documentation

We offer pre-built policies and procedures mapped to NIST SP 800-171 and CUI controls, thereby enabling rapid application and service documentation.

Continuous Assurance

Our Cybertorch™ platform provides near real-time situational awareness for security and configuration requirements with customized NIST SP 800-171 dashboards.

About Us

Quzara, LLC is a Cybersecurity firm located in the Washington, DC metropolitan area. Quzara's team of Architecture and Compliance advisors assist customers in achieving their specific Cybersecurity needs. Our team brings Compliance and Engineering expertise to help our customers manage Cyber Risk through innovation and best practices.
