

Fuel up your business with the largest fuel price and filling station database

Looking for fuel prices over the course of the day, location information of petrol stations, individual price averages or historical retail data? xavvy has the information you need!

The services offered by xavvy make it possible to compare market shares, optimize refueling costs, analyze locations, and maximize profit margins. In this way, we support retailers, car manufacturers, management consultants and navigation companies in providing their customers with up-to-date information and high-class service.

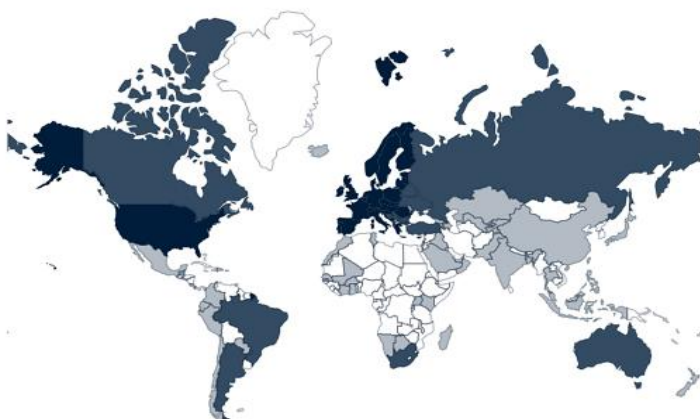

Station and Fuel Price Data

Our data gets collected through miscellaneous sources including governments, petroleum companies, fuel card providers and crowd sourcing. This enables xavvy to provide information on different station amenities and prices for various fuels, e.g.:

Station Data	Fuel Price Data
Brand and Name	Gasoline
Location Data	Diesel
Amenities	LNG
Payment Options	Hydrogen
Opening Hours / Restrictions	Electricity (EV)
Contact Information	Alternative Fuels (HVO100)

Coverage

Thanks to over 200 data providers, xavvy delivers information on more than 250k petrol stations and current fuel prices for over 100 countries worldwide.

Our Services

Integrate the largest database of Retail Fuel Station Data, Amenities and accurate Pricing Data in Europe and North America into your business.

Integration and Delivery

Consulting, integration with existing systems and specialized web applications. One-time or regular data delivery, push or pull services, and support for any data format.

Price Forecasts

Intelligent processes forecast fuel price trends for regions or individual filling stations.

Visualization

Heat Maps or charts of historical, current, and forecast prices by area or individual station.

Data Quality Enhancement

Map data to validate your existing dataset for veracity and correct erroneous data with one of our specialized tools.
