Azure Infrastructure and Database Migration Assessment

A comprehensive review of customer's infrastructure and databases which helps the customer prioritizing workloads to migrate to cloud

Business Outcomes

Receive an end-to-end analysis and mapping of their IT infrastructure (both physical and virtual), taking into consideration customer plans, current deployment, usage, processes, and data

Evaluate your overall infrastructure in relation to your on-premises and Microsoft Azure cloud strategy

Identify migration opportunities in Windows Server and SQL environments.

Investment $8,000 Duration 3 Weeks

What you can expect

1 Planning

Discovery
- All VM/DB including physical servers and desktops if WVD scenarios are involved

Coverage
- 3 Windows Server
- 2 SQL Server
- Linux
- OSS DB

Partner Profile
- Azure Expert MSP/Azure Advanced Specialization on Win SQL Server or Linux OSS DB

2 Comprehensive data approach for Assessment

Collection
- A comprehensive discovery of the customer's existing VM, databases and all physical servers (Win Server, SQL Server, Linux and OSS DB) using Azure migrate
- Relevant performance data and utilization such as CPU, network, RAM, disk and storage
- Collect desktop inventory if WVD is the scope

3 Data analysis

Analysis
- A comprehensive discovery of the customer's existing VM, databases and all physical servers (Win Server, SQL Server, Linux and OSS DB)
- Relevant performance data and utilization such as CPU, network, RAM, disk and storage
- Collect desktop inventory if WVD is the scope

4 Action

Implement a strategic plan created for your cloud journey
- Recommendation on next steps
- Migration plan

Up to 3 weeks

Why Veraqor?

Innovative engagement with Microsoft Certified Professionals that add values into your business
- Playbook Automation
- Speedy Delivery
- Future envisioning with AI/ML
- Agile Delivery

Additional areas of focus	
Azure Virtual Desktop	The WVD Business & Adoption Plan will provide customers with the information needed to progress WVD deployment plans and modernize their current VDI solution stack.
Azure VMware Services (AVS)	The AVS Assessment is an analysis of customer's VMware environment with the objective of quickly providing them with the costs and business benefits of moving to Azure VMware solutions.
