What is Picture login?

Remembering passwords can be pretty tough as it is, but for children who are just starting to type on a computer, this can be a very difficult task! Therefore, we let students log in fast and easy on their Chromebook by using a picture login.

With a combination of pictures (username and password) a student's logs can log in. What is the best thing about using Picture login? After logging in to a Chromebook, the student is immediately logged in to their Google-account. They can use all the G Suite apps without having to type an email address or password.

Step 1: Choose your class

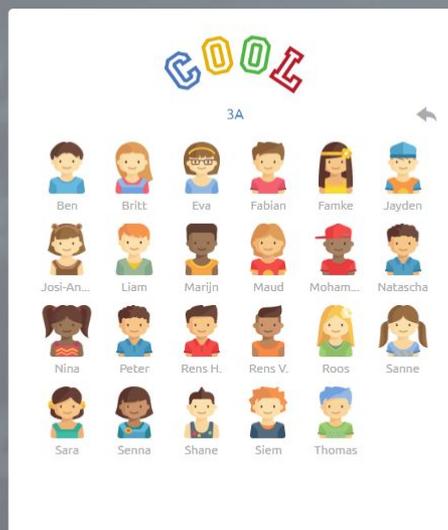

When opening a Chromebook, the student sees an overview of the school's classes

1. As a student, select your class by clicking on your class number (or picture)

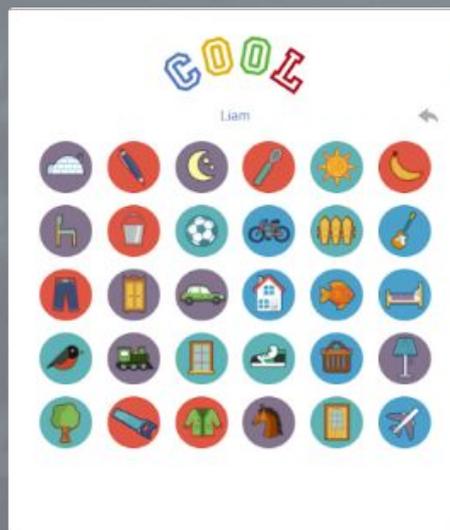

Step 2: Who are you?

The first time a student logs in, the student can pick a personal avatar from the list. Everytime he logs in, he can click on his own avatar to continue.

Step 3: Login picture(s)

Finally, the student clicks the picture(s) that form his password. After doing so, the student is logged in to the Chromebook and can access all G Suite apps

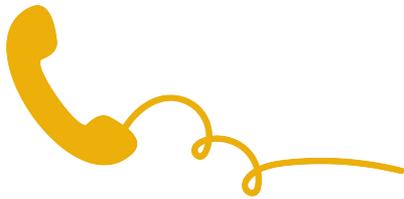

COOL Platform

After going through the previous steps, the student is logged in to the COOL Platform.

The screenshot shows the COOL Platform interface. At the top, there is a navigation bar with the text "Training Cloudwisers" and "Trainingen" with a dropdown arrow. On the right side of the navigation bar, there are icons for Google and a user profile labeled "SJ". Below the navigation bar, the COOL logo is on the left, and a secondary navigation bar contains the following items: "Applications" (highlighted in green), "Groups" with a dropdown arrow, "Notice board", "Monitoring" with a dropdown arrow, "Timetable", "Classroom", and a settings gear icon. The main content area is titled "App library: Favourites" and features a search bar with the text "Search" and a close button (X). To the right of the search bar are three icons: a grid view icon, a list view icon, and a star icon with a notification badge showing "17". Below these are 18 application icons arranged in a 3x6 grid:

- Google Classroom
- Google Docs
- Google Drive (LK)
- Gedeelde map
- Kahoot
- Google Mail
- Geoboard
- GoConqr
- tinytap
- Socrative
- Easel.ly
- Canva
- Quizzz
- Edpuzzle
- Talky
- Pear Deck
- ChartGo
- Add application
