WE GET ENABLING RESILIENCY AND FLEXIBILITY TO QUICKLY ADAPT TO SHIFTING PRIORITIES.

CDW Amplified™ Hybrid Cloud
Azure VMware Solution
Design and Deployment Workshop

Your organization's ability to expand or react to market changes with speed and agility is often challenged by VMware workloads running in on-premises data centers. To add flexibility and resiliency to your environments, you can utilize VMware investments and seamlessly integrate with Azure for workload transportability and cost optimization.

Azure VMware Solution (AVS) are certified by VMware to run natively in Azure, leveraging your existing investments including vSphere, vSAN and vCenter. The AVS platform and accompanying Cloud Native Orchestration tools provide organizations with a multitude of cloud technologies that reduce complexities and allow digital transformation to modern applications. This approach allows IT departments to focus on more strategic tasks and projects that drive true business outcomes.

With the AVS Design and Deployment Workshop, you can leverage CDW's expertise to successfully plan the design of an AVS solution, including architecture, infrastructure deployment and migration of VMware server workloads into Azure. Additionally, the workshop enables your team to plan, develop and operate the solution in conjunction with CDW guiding the way. We provide a proven plan that allows teams to start bringing products and services to market faster than ever before.

CDW's AVS Design and Deployment Workshop can help you achieve:

Operational Efficiencies

Agility

Faster Innovation

Orchestrating the Right Solution

The AVS Design and Deployment Workshop includes an assessment, solution development, configuration and deployment of a VMware solution in Azure. We work with your IT team and business leadership to ensure we correctly target initial success criteria.

To get started, our CDW VMware Design Workshop team evaluates your current IT infrastructure and platforms, and gathers all the technical requirements needed for a successful project. Then the installation and configuration of AVS together with workload migrations becomes an integral piece to your initial AVS migration success.

CDW's experts in VMware and Azure will design and build complex VMware Cloud and cloud solutions that drive your business solutions.

CDW GETS AZURE AND VMWARE

CDW, VMware and Microsoft Azure have teamed up to bring our leading capabilities together and deliver a truly compelling and differentiated solution featuring AVS. CDW carries a broad set of capabilities around VMware, including leading compute, storage and network virtualization capabilities.

Our team of highly skilled engineers has designed platforms, migrations and multi-cloud solutions for organizations of all types and sizes, including financial , government, health care, transportation and security industries, and more.

Our delivery teams feature VMware-certified engineers, and, as a VMware Principal Cloud Partner, CDW is fully certified to deliver VMware Cloud solutions.

CDW has earned a number of Microsoft Solutions Partner designations and Specializations, and is an Azure Expert MSP.

We design, orchestrate and manage customized services and solutions for all organizations of types and sizes. Let CDW focus on the IT business, so you can grow yours.

CDW's full lifecycle of Services can support your organization no matter where you are on your journey

Design → Orchestrate → Manage   On-Premises → On-Journey → Cloud-Based

CDW AMPLIFIED™ SERVICES

Services Overview

The following elements are included in CDW's AVS Design and Deployment Workshop:

Service	Assess	Design	Deploy
Assessment and Preparation	✓	✓	
Readiness Validation	✓	✓	
Authentication Configuration	✓	✓	✓
Pre-engagement Questionnaire Review		✓	✓
Discovery Session with Stakeholders		✓	✓
Solution Development Roadmap (high level)		✓	✓
Security and Identity Assessment		✓	✓
Review and Validate Success Criteria		✓	✓
Design Workshop			✓
Azure Validation			✓
Azure Implementation			✓
Virtual Network Configuration			✓
Create S2S VPN			✓
Deployment of ExpressRoute			✓
Deploy AVS from Marketplace			✓
Configuration			✓
vSphere Integration			✓
Validate and Test			✓
Migrate Workloads (up to five)			✓

Certifications

CDW has earned the following certifications from Microsoft and VMware:

Microsoft Partner
Azure Expert MSP
