UCMC NetCM

At UCMC, we use our systems integration expertise and partnerships with leading OEMs to Automate repetitive, manual tasks to make operations more efficient and productive .

By using Open Source Configuration Management Platform powered by Ansible to automate network-related day-to-day activities and integrate it with several Network Devices.

CHALLENGES

- Repetitive manual works
- Chances for errors
- Loss of Productive Hours

IDEAL SOLUTION

Automate repetitive, manual tasks to make operations more efficient and productive .

DESIRED OUTCOMES

- Increase IT availability
- Improve productivity
- Make significant cost savings

GBM

NetCM System on Microsoft Azure offers a simple and cost-effective approach to manage the Network Devices on your Infrastructure.

Well suited for Infrastructure where it is inconvenient or impossible to directly connect to your infrastructure or where constant Network configuration is required for critical environment. Typical industries include manufacturing, power, banking , oil & gas.

1 Monitoring System

The system is equipped with the WebAdvantage reporting system to allow configuration management of network devices.

2 Proactive Approach

Automate repetitive, manual tasks to make operations more efficient and productive .

3 GBM & Microsoft

The GBM (UCMC) and Microsoft Azure integrated solution leverages Azure for extending your capabilities and workflow.
