

MÖBIUS

AN OPEN BANKING PLATFORM

Möbius is Silverlake’s strategic Digital and Open Platform for Banking. We combine award-winning customer-facing digital capabilities with proven core banking processing capabilities to create a full digital, unified, open, end-end platform for commercial banking. It is **cloud native** and can be deployed on either private or public cloud.

Use Public, Private, Hybrid Cloud Infrastructure Capabilities to deliver Scalability, Fall-back, Dynamic Resource Management, Multiple Concurrent Releases etc.

BANK IN A BOX

Comes ready with full CASA, FD, Loans, Cards products that are configurable for speed to market

OPEN API

Open APIs enables strategic alliance with business partners – e.g. eCommerce, Solicitor portal, Car dealer portal, Insurance, Property Valuer and Credit card portal.

CLOUD NATIVE

Highly scalable with high availability on cloud with low and elastic TCO.

OMNI-CHANNEL

Omni-channel design which is operationally superior to any silo play and enables easy addition of innovative branch devices (e.g. robots, smart kiosks).

OUR SUCCESS STORY

Background

Large South East Asian Bank incorporated in 1906, this tier one commercial bank has close to 700 branches serving over 16 million customers.

Challenge

The bank was looking to transform digitally to become a regional financial technology group while not disrupting their legacy business as usual.

Our Solution

We implemented our cloud native **Möbius** Digital Bank Platform on Cloud to deliver multiple digital business lines also known as monolines end to end. All projects were implemented in an agile manner with multiple MVP releases and all on Cloud. The **Möbius Digital Core** will co-exist with the Bank’s legacy core.

Results

Their first monoline project was initiated and went live in **10 months**. End to end, It allows for customers to apply for an auto loan, get approval and disbursement in **20 minutes**.

In parallel, the 2nd monoline project was started and completed just **4 months** later.

A 3rd monline project is also underway while the first 2 monolines are getting new MVPs refined. The bank estimates that it will save **30 to 40% in TCO** in comparison to traditional development and it also allows business to drive change.

ABOUT US

Silverlake Digital Economy was founded in 2012 as a FINTECH focused on applying disruptive technology to digital banking.

The Open Banking Platform provides the customer experience and processes for all products and services of a commercial bank and ‘speed to market’ configurations to manage change in a new digital world of continuous, fast-moving change.
