

Plan365.UseWise

Cost center planning with collaboration and security embedded

About UseWise

We are building a multi-cloud platform that will enable companies to use the public cloud in a transparent manner.

Cost center planning with Plan365.UseWise

Plan365.UseWise enables companies to plan and budget easily and in an automated manner using familiar M365 tools.

Plan365.UseWise combines planning and budgeting with Microsoft security and adds user empowerment and simplicity of use to the mix.

Business process of cost center planning and budgeting solved

With Plan365.UseWise you can create companies within your group as separate planning entities in the application, define planning periods you need, cost centers and charts of accounts. Planning tables are shared with groups of individual planners and they enjoy many features making their planning easy.

Easy to use

CFO and controlling are in charge of the application and they create and manage the entire planning process including Microsoft security groups that are used to assign user rights.

Security and privacy

Plan365.UseWise is built on top of M365 and therefore security and privacy of Microsoft is embedded into our application.
