

## Are you required to address the Executive Order 14028 requirements?

### Workshop highlights

Understands how Azure Active Directory address the Executive Order 14028 requirements

Gain insights into apps used in your environment – even ones unsanctioned by IT

Understand how to prevent identities from being compromised

Learn how to reduce costs and improve business agility and security with simplified app access

### Protecting identities. Securing the future.

Identity is today's control plane for digital transformation. Organizational barriers are blurring between who is in and out of your network. Cloud apps and the increasing use of personal devices and remote work mean that data is no longer centralized behind traditional network security.

With identity attacks on the rise, this workshop will show you how to stop tomorrow's data breaches by securing identities today.

We will help you design and plan out your optimal identity model to ensure you have a roadmap for enhanced security addressing the Executive Order 14028 requirements.

### Why you should attend

Given the complexity of identities, data, applications, and devices, it's essential to learn how to ensure the right people are accessing the right information, securely. In this workshop, we'll show you how identity is the fundamental pillar of an integrated security philosophy and end-to-end security strategy addressing the Executive Order 14028 requirements.

By attending, you can:

#### Optimize identity

Identify potential risks related to identity and see opportunities for improvement.

#### EO 14028 requirements

Understand how Azure Active Directory can help you address the EO requirements

#### Reduce costs

Minimize expenses associated with AD FS by migrating to Native CBA.

#### Increase visibility

Get recommendations and next steps to move forward with Azure Active Directory

## What to expect

The foundation of cybersecurity is to quickly and accurately identify authorized users and give them proper access to the information and tools they need to do their job. Our goal is to provide you with tools to protect your authorized users' identities so you can authenticate credentials and manage file access while still giving users the freedom to collaborate with others.

We'll work with you to:

- Mitigate your access risk by protecting, monitoring, and auditing access to critical assets through identity governance
- Outline strong authentication methods like native certificate-based authentication and phishing resistant multi-factor authentication
- Help you understand situations where your identity might be compromised with remediation steps
- Improve migration and governance to align with Executive Order 14028 guidance

## Who should attend

The workshop is intended for security decision-makers such as:

- C-SUITE
- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Identity and or Application owners/decision-makers
- IT Security
- IT Operations
- Security Architect
- Security Engineers
- Application business owners
