UQUDO'S PLATFORM

for Financial Services

uqudo - An Award-Winning Solution

With an increased need for contactless digital solutions, financial institutions are looking for optimum means to facilitate business growth through authenticated and verified identity management. uqudo offers an AI-powered trusted Identity as a Service. We enable seamless incorporation of essential onboarding functions whilst aiming to eradicate identity fraud by providing the addition of an identity layer. Understanding the need for change, we address evolving business requirements whilst adhering to country-specific rigorous KYC, AML and CDD specifications.

With a proven framework for organisations, uqudo has created an ecosystem to provide an agile environment for functional business processes. We are connecting millions of users to hundreds of organisations across borders.

How Our Solutions Work

Secure Self-Onboarding

Identity Sharing

Biometric Authentication

The challenges faced by financial institutions are within the authenticating and verification of their customers which include:

- *360 view of customer's profile*
- *Paperless, formless and frictionless experience*
- *Customer focused, customer driven*
- *Detect and deter identity fraud*
- *Customer regulation, governance and compliance*

Data Capture
