

# RSK Enterprise Cloud

Fast-track your ability to build, manage, and deploy great blockchain networks and apps at scale.

With RSK Enterprise Cloud, Businesses, Governments and Developers can easily benefit from a new generation of decentralized apps **faster**, at **lower cost** and **simple operation**.

## What is RSKec?

Is a **multi-platform** and **multi-network** Blockchain-as-a-Service (BaaS) for building and running truly decentralized applications.

You can connect to shared nodes of networks such as RSK, Lacchain and Ethereum (and more soon) and start sending transactions right away or create and deploy your own Hyperledger Besu network in minutes.

Accelerate your development with Blockchain **ready-to-use components** (wallets, decentralized credentials, DID management, and more).

UNLOCKING THE POWER OF VALUE NETWORKS  
**Platform + Ecosystem**

## Why customers use RSK Enterprise Cloud

- Better time to market
- High quality Blockchain applications without specialized resources required
- Stay updated with the rapid evolution of the Blockchain world

### Simplify your Blockchain infrastructure deployment

- Deploy your Blockchain environments in minutes hosted in **Azure**
- Run everything, from POC to enterprise-grade blockchain applications.
- Easily Integrate your Enterprise IT with decentralized networks

**Connect within minutes**

### Accelerate DApps development

- Fast-track development using pre-integrated solutions and services
- Pick-and-mix highly reusable technology components
- Take advantage of the knowledge from RSK and its ecosystem

**Add value with less effort**

### Smooth Operations

- Simple infrastructure management
- We maintain Blockchain nodes and updates for you
- Shift resources away from platform operations

**Focus on your business**

Gasnor, an Argentinian Gas distributor company with more than 1,5M customers, implemented a permissioned Blockchain over RSK Enterprise Cloud platform. The gas connection certification process was very complex as it involved integrating various actors and validations. "We implemented a solution where our customers could solve the entire process remotely but in a secure and transparent way aligned with current regulations for the industry. A permissioned blockchain network that integrate the entire Gas Ecosystem with a simple interface allowed us to **easily deploy the network** and develop the first use case **in a fraction of the time and cost compared** to any conventional development option. - Carlos Amin, CIO, Gasnor

# Our platform is the best option for Blockchain solutions where multiple parties must share crucial information or transact safely

## Blockchain infrastructure deployment

- Create a Cloud workspace, and connect via API to RSK (and more) nodes with no installation steps required
- Turn months of setup into minutes
- Integrating your existing IT core with Blockchain easily

## Best tools for yours blockchain apps

- Access to reusable components to create the most common use cases (Wallet, Verified Credentials, Token Factory, and more)
- Faster time to market, 30+% in cost savings
- Create your own components for your industry and make them available to our Ecosystem.

## Extrimian & Azure

- Azure environments deployment automated and fully integrated to simply access Nodes via API
- Manage your Workspaces or simply rely on us and Azure for your Cloud operation
- Expand the reach of your DApp with Azure Marketplace

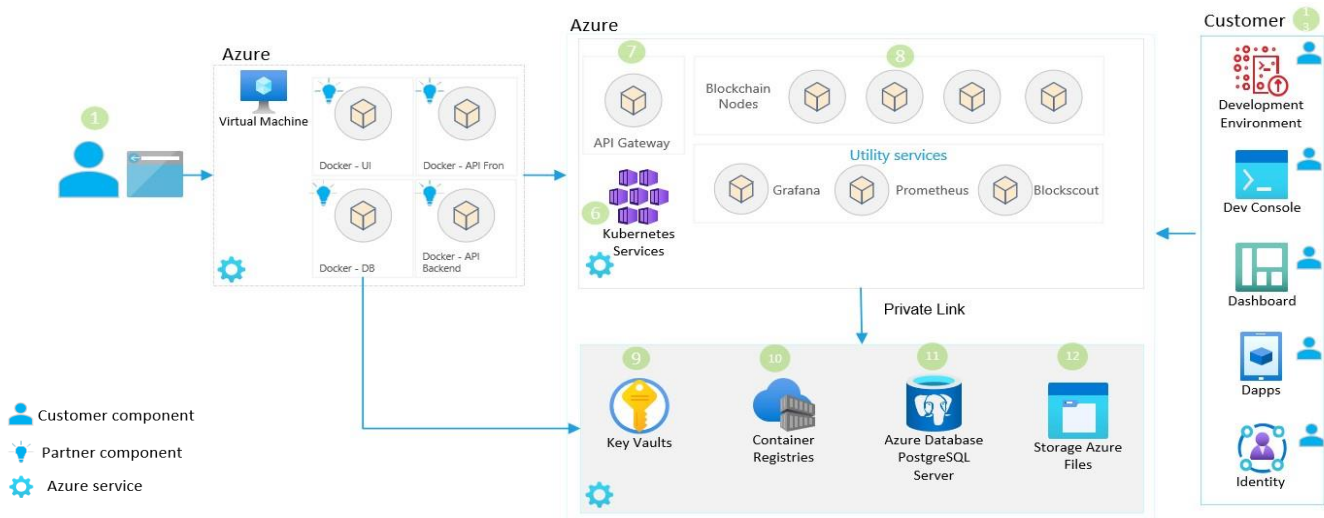

## RSK Enterprise Cloud will open blockchain potential for your organization

### Our proposal to you

We provide Blockchain infrastructure and app development combined in a single powerful user experience with no need of advanced skills in DLT.

### How to get started

- Download RSK Enterprise Cloud from Azure Marketplace and start your project
- Create and deploy your next blockchain solution by selecting our reusable components
- Extrimian with RSK Enterprise Cloud will constantly support and maintain up to date your tech component in a changing ecosystem

## Why Extrimian?

Extrimian was dreamed by very experienced and passionate technology and business experts with the objective to take the world to the next level of transformation. +6 years implementing real Blockchain projects into the Financial Market, Retail, Energy, Health and Government verticals that help us to develop a platform to accelerate the Blockchain adoption process.

Extrimian is a Joint Venture between IOVlabs, and Grupo Sabra aimed at building a blockchain based enterprise solution platform called RSK Enterprise Cloud, to enable organizations embrace the benefits of blockchain technology.
