

HCL Launch

Continuous Delivery

Deploy anything, anywhere

From Mainframe to Microservices and everything in-between, HCL Launch is engineered to handle the most complex deployment situations with push-button automation and controlled auditing needed in regulated and technically diverse enterprises.

Overview

HCL Launch is an enterprise-level continuous delivery solution that helps you achieve automated, consistent deployments and rollbacks of applications. HCL Launch integrates with build and test tools to deploy, test, and promote new builds with ease.

Start with a strong automation foundation

HCL Launch establishes the backbone for your entire CI/CD pipeline, integrating build, deployment, middleware, and change management to enable automation across any technology stack.

Make work easier and get value faster

HCL Launch makes complex, compliant deployments push-button easy while minimizing resources needed in enterprise level continuous delivery infrastructure.

Grows with your security and workload needs

HCL Launch is designed to scale with your organization and its security requirements so there's never a need to rip and replace.

Features & Capabilities

Quality gates and approvals

Use environment quality gates and approval processes to ensure that only the right stuff goes out at the right time and to easily identify the who, what, when, where, and how of deployment automation, making compliance and audits a breeze.

Multi-tier application models

When applications have many components, HCL Launch makes sure components that were tested together are released together.

Drag-and-drop process designer

Create and visualize large, complex automation processes at a glance, and easily understand the conditions for success and failure. Leverage the template functionality to implement best practices across teams.

Comprehensive inventory system

Easily compare environments and track what is where with HCL Launch's inventory system that tracks the desired state of each environment, as well as what has been successfully deployed, and provides graphical alerts when an environment is out of compliance with that desired state.

Extensive plugin library

With more than 250 supported integrations, you can easily connect your current tools to HCL Launch and tackle DevOps confidently knowing your past technology investments still play an important role.

Achieve continuous delivery for the enterprise with HCL Launch.
