High Level Security Review

Shaping Cloud

Getting started

| Scope | Discover | Assess | Report |
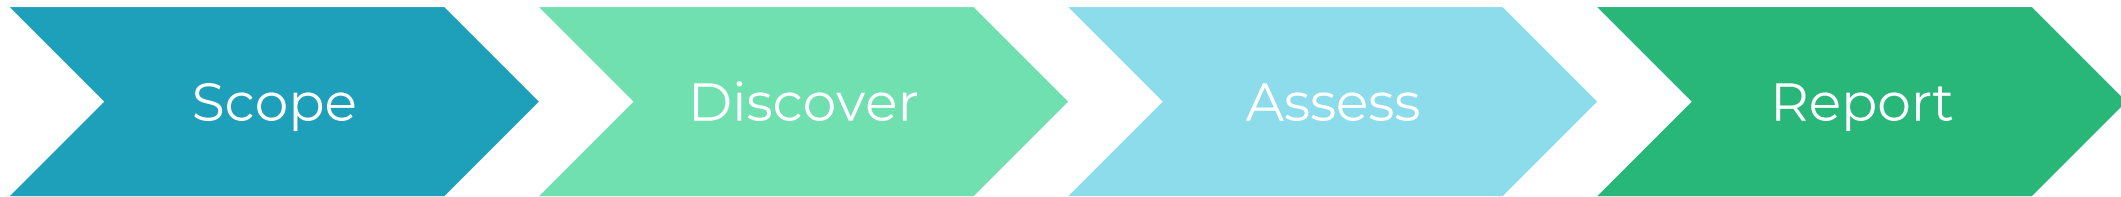

1 Scope

We scope out which parts of your IT Infrastructure you want to include against our standard 8 pillars

2 Discover & Assess

We assess your on-prem & cloud environment against the scope in the initial workshop

3 Report

We provide a report highlighting your current security posture and identify any recommendations that can be implemented to improve your security.
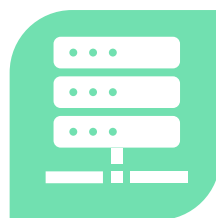

Scope

IT Governance

Network access

End user devices

Applications

Data

Server infrastructure

Identity

Crisis management

Shaping Cloud

Cloud first

We are a true cloud-first focussed Microsoft Gold Partner

Extensive experience

We have strong, referenceable case studies across NHS, enterprise, Gov, and local and regional

Realistic advice

We provide realistic and pragmatic advice based on real-world operational experience

Technical knowledge

A breadth and depth in technical knowledge across the delivery team

Early Azure adoption

Shaping Cloud was one of the first adopters of Azure – we've walked the walk since day one

Proven track record

A proven track record delivering digital transformation
