# SymphonyAI Industrial

Industrial AI for the future of business

Accelerating autonomous plant operations

SymphonyAI Industrial is

an innovator in industrial insight,

accelerating autonomous plant operations.

The industry-leading EurekaAI/IoT platform

and industrial optimization solutions

connect tens of thousands of assets

and workflows in manufacturing plants globally

and process billions of data points daily,

pushing new plateaus in operational intelligence.

SymphonyAI INDUSTRIAL

Manufacturing focus

Challenges	Industrial AI Capability	Benefit
Return on capital employed Cost of poor quality	3rd gen AI / multi-variate analysis at machine level and process Level	Prediction & prescription to maintain optimal asset health Setpoint advisories for optimal process throughput and yield
Benchmarking the enterprise	Standardized information model that feeds into manufacturing operations analytics	Standardized view across plants Drive continuous improvement across enterprise
Eliminate process variability Continuous improvement	AI assisted process analysis and suggested improvement No-code workflow builder	"Golden Batch"
Improve worker productivity and address labor shortages	Connecting the frontline worker with "bite size" work instructions with audit trail	Work standardization, speed and compliance
