

SOLVE SOME OF THE MOST COMMON SECURITY CHALLENGES WITH GOVERN 365'S VIRTUAL DATA ROOM

VDRs have long been used in specific industries for sharing and distribution of highly sensitive information. However, this poses certain challenges for companies using them.

Lack data sovereignty (data must be stored in their cloud)

Proliferation of several encryption technologies (DRM)

Lack productivity features offered in Microsoft 365

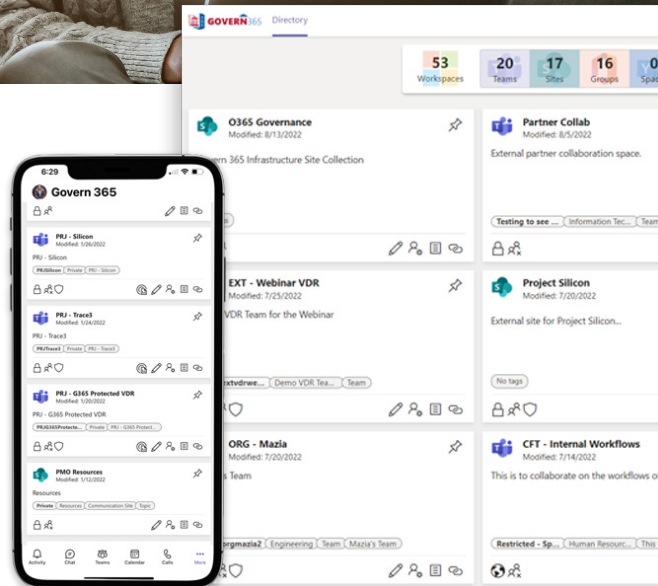

Requires users to learn a solution-specific interface

Govern 365's virtual data rooms are built to work with Microsoft 365 Teams and SharePoint to protect your sensitive information while ensuring data sovereignty.

Govern 365 provides end-to-end automated implementation of DRM technology using Microsoft Purview. Our app allows you to retain your data sovereignty and encryption control without compromising Microsoft 365's advanced productivity capabilities so you can collaborate, securely.

WHY GOVERN 365'S VDR?

Govern 365's virtual data room is lean and affordable, offering the essential protection and encryption features that most customers need without all of the feature bloat and expensive pricing of many industry-specific alternatives.

Built on Microsoft Purview, external and internal recipients can safely & securely take advantage of secure collaboration while having data stored in their own repository, having a collaborative experience that allows co-authoring, on both the web as well as applications they already have installed.

Our VDR allows for enhanced searching capabilities, an unlimited number of users that can participate, intellectual property protection where protection is required, and much more!

FEATURES & BENEFITS

Leverage Microsoft 365 as a VDR for

FINANCIAL TRANSFERS AND FUNDRAISING

DUE DILIGENCE FOR MERGERS AND ACQUISITIONS

INITIAL PUBLIC OFFERING (IPO)

COLLABORATION ACROSS COMPLEX DISTRIBUTED SUPPLY CHAINS

BOARD COMMUNICATIONS

SENSITIVE DATA EXCHANGE DURING CLIENT ENGAGEMENTS

JOINT DEAL MANAGEMENT

LEGAL PROCEEDINGS

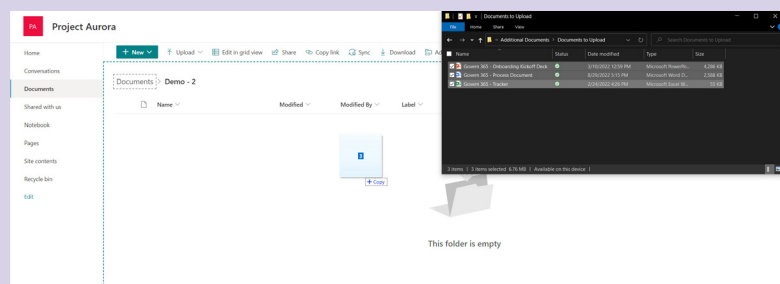

RESEARCH AND DEVELOPMENT

AUTOMATICALLY PROTECT YOUR CONTENT USING SENSITIVITY LABELS

Automatically protect uploaded content using Microsoft Sensitivity Labels, while synchronizing label permissions to workspace access control, providing a no-touch content protection system throughout the entire life of the content.

Documents > Demo - 1

	Name	Modified	Modified By	Label
	BoxTest.pptx	A few seconds ago	Megan Bowman	Protection Pending
	Copy of Book1.csv	A few seconds ago	Megan Bowman	Protection Pending
	LIT-Vivid-Vision.pdf	1 min ago	Megan Bowman	ProjectAurora
	Resume.docx	1 min ago	Megan Bowman	ProjectAurora
	Sales Summary 2.xlsx	1 min ago	Megan Bowman	ProjectAurora

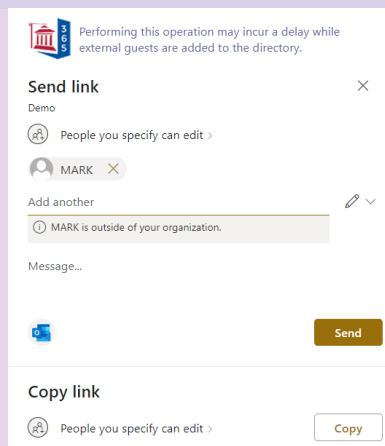

DRAG & DROP FILES

Easily drag-and-drop files you want to track and protect, or you can also upload them directly from your desktop. You can upload files on the go via Govern 365 from the Teams mobile app into the secured workspace.

COLLABORATE WITH INTERNAL & EXTERNAL USERS

Collaborate seamlessly through secure sharing links, that seamlessly manage content protection for you.
