

Eclipse

Modernize your public safety agency with a **cutting-edge 9-1-1 Analytics Solution** that will track and improve your agency's performance in **five ways...**

2.

Enable data-centric decision making

By processing 9-1-1 calls in near real-time and storing them in the cloud, you will count with actionable insights based on present data that will proactively help your public safety agency solve problems and make better decisions.

1. Customize our User-friendly Dashboards

1.

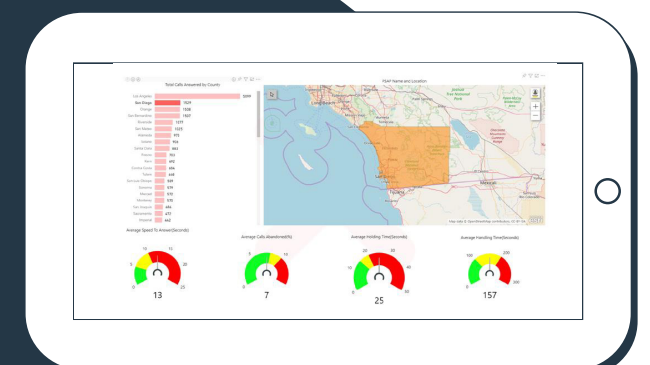

Understand, measure and improve your daily processes with interactive data, such as visualization graphics, tailored to meet the unique needs of your Agency and uncover hidden insights, patterns, and trends driving performance.

3.

Unlock future-ready features and integrations

Eclipse Analytics is constantly innovating and improving in order to bring you new features and capabilities at no extra cost, and to evolve your agency with updateable cloud-based technology.

5.

Comparable PSAP performance

Establish performance benchmarks and compare efficiency across PSAPs.

4.

Automate our easy-to-use reporting capabilities

Configure the sources of data and the frequency of your reports to be compliant with regional and/or national standards, and to be shareable with pertinent stakeholders.
