

# Endpoint Management Workshop

Manage and protect your devices, your apps, and your users

Today's users are looking for more ways to remain productive while working on any device. 95% of organizations allow personal devices in the workspace. All these devices add additional risks, when you consider that 70 million smartphones are lost every year.

**Enable users to be productive, on any device, without compromising IT security**

## Modern Endpoint Management

## Workshop Highlights

Learn how to build management policies that protect your users, company data, and devices

Gain insights about your users' endpoints and their compliance with your IT policies

Determine the best way to give your users access to the apps they need on the devices they choose

**Learn how to improve your management capabilities with Microsoft Endpoint Manager.**

With this three-day workshop, we'll show you how you can use Microsoft technologies to:

- Discover and protect your endpoints
- Secure your users' identities
- Increase operational efficiency
- Take advantage of seamless security and compliance features that safeguard your business

Threat Protection

# What To Expect

Get an executive deep dive into remote deployment, management, and the security of corporate and BYOD devices in your organization. Our goal is to show you the best ways to manage endpoints at the enterprise level. We'll provide you with the ability to protect your authorized users' identities so you can authenticate credentials and manage access while still giving users the freedom to collaborate with others.

## We'll work with you to:

- Learn how to improve your management capabilities with Microsoft Endpoint Manager
- Discover and protect your endpoints by enforcing policies and deploying security tools
- Secure your identities with multi-factor authentication and conditional access from any device
- Enable your users to be productive with the applications they need, on the devices they want

We'll customize the workshop based on your organization's needs

## Engagement set up for:

Microsoft Endpoint Manager | Baseline Security | Device Config & Management
