

RAMP – Rapid Assessment and Migration Platform

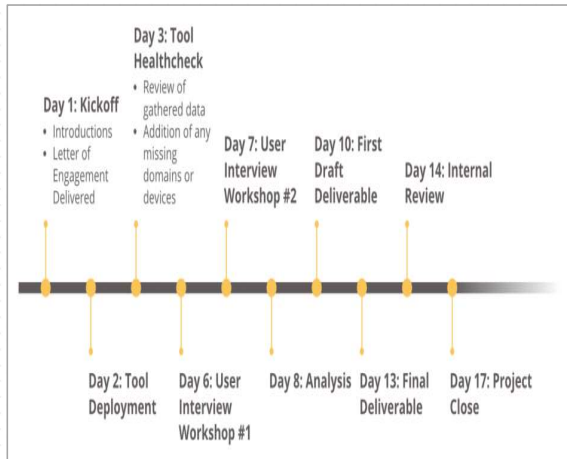

Migration Path – 6R Analysis (Sample)

Indicative Recommendations for Workload migration

- 4 applications can be Re-Hosted to the cloud - Application versions, databases, and OS support a lift-and-shift methodology
- 6 applications will need to be Re-Platformed - Application version is dated, and / or underlying OS out of support, increased risks without upgrades
- 8 applications should be Retained - Application cannot be upgraded, tied to current platform / Cloud for one functioned / requires hardware
- 2 applications should be Retired - Business driven decision / Functionality can be replaced or incorporated into another application

Re-Host (4)	Re-Platform (6)	Retain (8)	Retire (2)
Auto Link	BIAMS	Customer Price	Insight Budgeting
IGen	BI Publisher	Notify Filter	Insight Reporting
Nintex (part of SharePoint)	JDE	Price Management	
Regal Pay	Consultant Management Application	Price Filter	
	DAS, Reports Now	Right Angle	
	Item Link	Transaction File	
		HRF - Suppliers	
		BloomBargRequestBuilder
