

MODERN WORKPLACE SOLUTION PACK

The workplace is changing, with new employee expectations, globally distributed teams, and a complex threat landscape.

QuoStar's Modern Workplace service empowers your workforce with best-in-class technology, including productivity and collaboration tools, device management, and security solutions to safeguard your business data.

WHAT'S INCLUDED

QuoStar's Modern Workplace service comprises the following seven components:

- ✦ **Architecture:**
 - Utilise Microsoft Azure for a flexible, scalable, and secure IT architecture in the public cloud.
 - An architecture for modern users that balances flexibility and rich user experience with governance and security for optimal control and safety.
 - Seamless device provision through Microsoft automated Autopilot services.
- ✦ **Resilience:**
 - Cloud based encrypted data backup for critical file data through Microsoft O365 backup services.
 - Disaster Recovery and failover protection through Microsoft Azure Site Recovery.
- ✦ **Security:**
 - MDM, MAM & MFA to secure business data on end-user devices and assets via Microsoft Intune.
 - Anti-virus, anti-spam and endpoint security solutions via Microsoft Defender.
 - Perimeter security and external threat protection via Microsoft Sentinel.
- ✦ **Collaboration:**
 - Unified communications, telephony and conferencing services through Microsoft Teams and direct routing.
 - Leverage the Viva Suite to modernise user engagement
 - SharePoint document management and storage.
- ✦ **Flexibility:**
 - Work from any device, anywhere using Microsoft online services and cloud technologies.
- ✦ **Licensing:**
 - Provision of underlying licensing for all services through M365 NCE licensing agreements.
- ✦ **Support:**
 - 24x7 Fully managed support for users, platform and software requests, including security patching, systems updates and service delivery management.
