XDR and Sentinel: Proof of Concept

About XDR and Sentinel:

TEUNO is a technology services company focused on communications, cybersecurity and cloud. We expedite our business client´s services, as a result their productivity increase, and their expenditures decrease. Our main competitors are another technology providers.

What we offer

Our solution aims to demonstrate identification, protection and automatic response to threats through the combination of Microsoft Defender for Endpoint and Sentinel. Defender's functionalities allow endpoint analysis by adding visibility of threats, vulnerabilities and security scores, which, added to SIEM rules, allows events to be contextualized and treated as security incidents.

At the end of the demonstration you will have:

- Implementation of basic rules of MS Defender

- Threat detection and security dashboards for endpoints

- Collection and detection of MS Defender events in Sentinel

- Demonstration of our CSOC service with triage tests and investigation of Defender events

What our customers are saying

Defender's functionalities allow endpoint analysis by adding visibility of threats, vulnerabilities and security scores, which, added to SIEM rules.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
