

# INTELLIGENT SECURITY AGAINST NEW- AGE THREATS IN THE MODERN WORKPLACE

With Microsoft 365

Infosys®  
Navigate your next

The remote and hybrid working models have proved their effectiveness during the pandemic, however, they have also introduced a new set of security complications for organizations. While using multiple devices to access

the corporate network from anywhere and Software-as-a-Service (SaaS) applications to accomplish tasks, safeguarding identities, devices, data, and apps across multi-cloud platforms has become incredibly challenging.

80% of breaches involve lost or stolen passwords

60% of BYOD are not secured by IT

34% of all data breaches are caused by insider threats

\$1.07 M increase in average cost of a data breach due to remote work

88% of organizations that consolidate their security portfolio diminished their risk of breach.

## SAFEGUARDING HYBRID WORKPLACES WITH MICROSOFT 365

A paradigm shift in cyber security, towards solutions that follow the principles of Zero Trust, is imperative in this era of next-gen cyber threats to ensure the success of hybrid and remote work models. This would enforce -

- Movement from assumption to explicit verification
- Adoption of a policy-based, least-privileged access model
- Designing with the principle that every element of a system can be breached

M365 offers comprehensive modern workplace security based on Zero Trust principles. Its interconnected products and Zero Trust Security framework provide a unified experience and secure the customers' highly distributed and hyper-mobile environments with end-to-end offerings and provide best-in-class protection across the entire digital estate – identities,

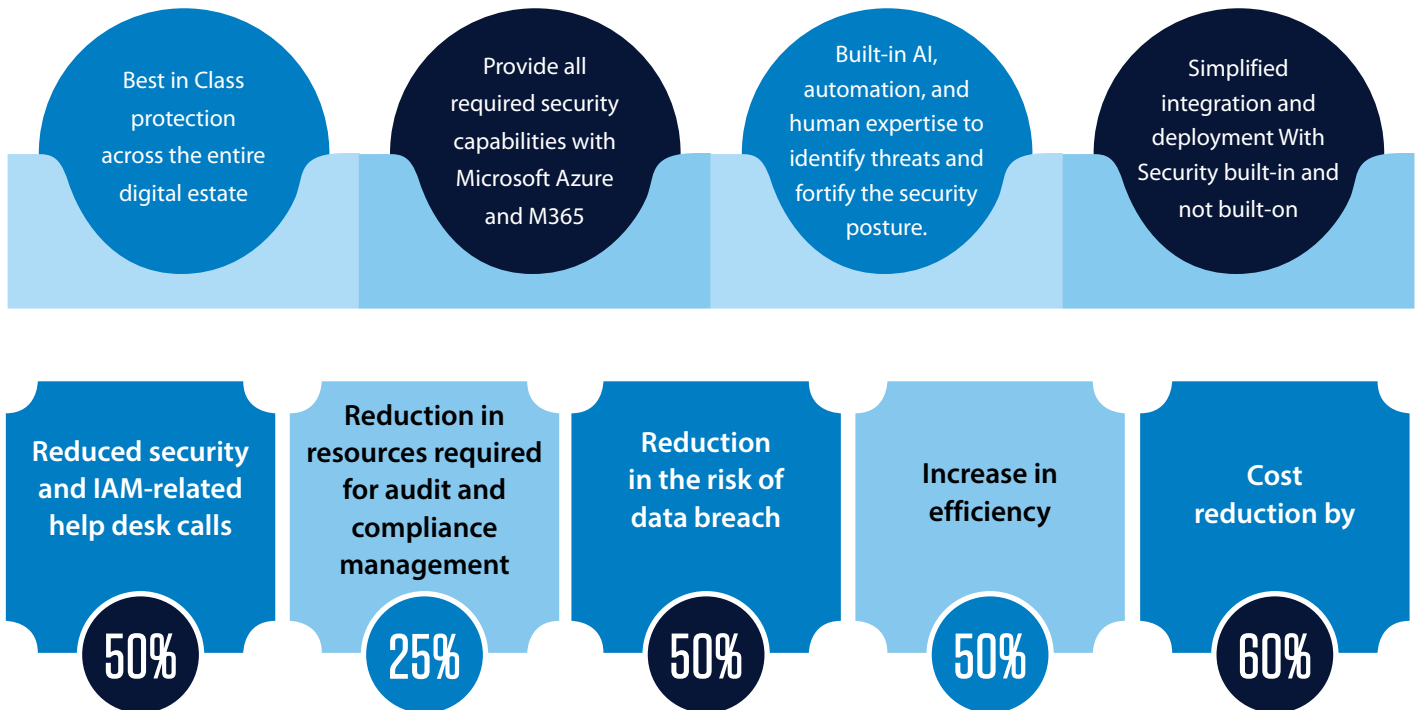

endpoints, data, emails, applications, and cloud. Organizations also need to be equipped with the tools to understand their vast data landscape, identify, and classify sensitive data to ensure proper protection, apply data loss prevention policies, and meet data compliance or regulatory requirements.

The M365 security products help an organization to build a new security model that more effectively adapts to the complexity of the modern environment, embraces the hybrid workplace, and protects people, devices, apps, and data wherever they are located.

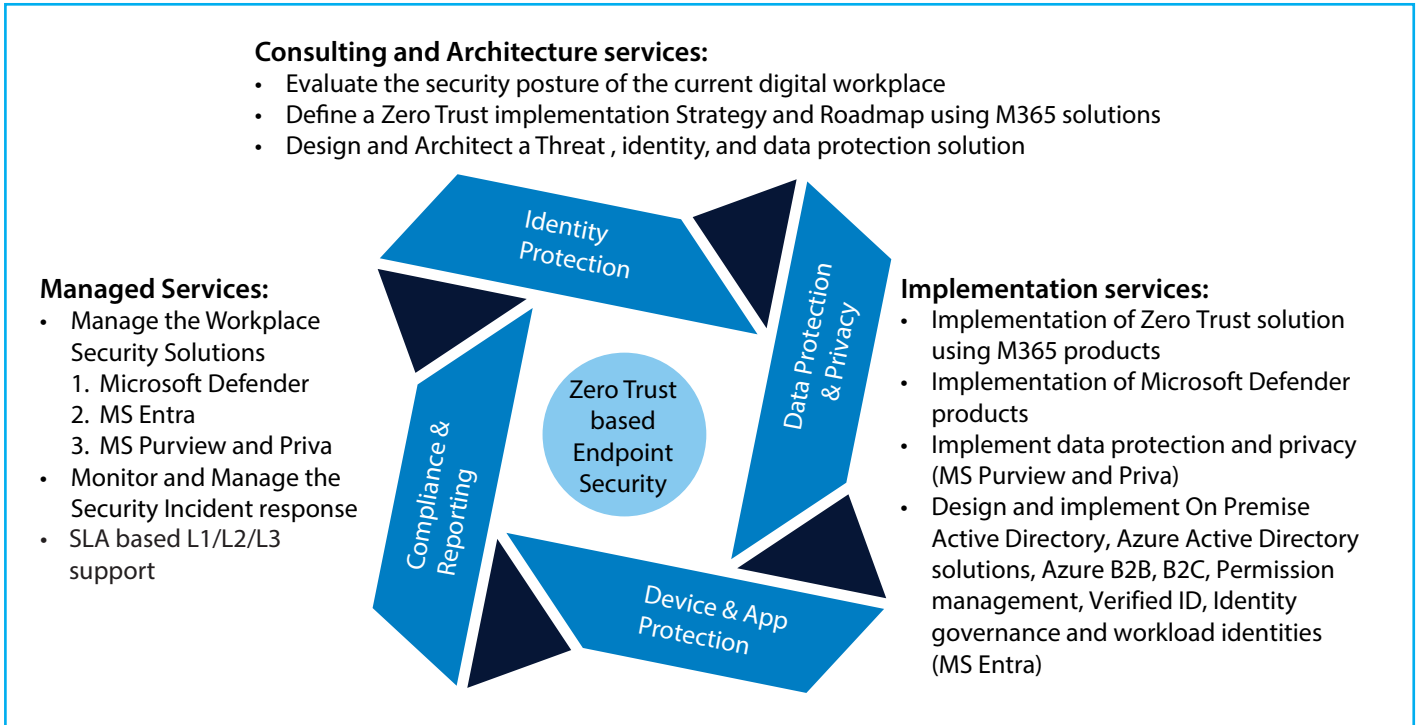

SOLUTION AREAS AND PRODUCT FAMILIES		KEY CAPABILITIES	
 <p><b>MS DEFENDER</b> THREAT PROTECTION SECURITY</p>	<ul style="list-style-type: none"> <li>Defender for Endpoints</li> <li>Defender for Identity</li> <li>Defender for Cloud Apps</li> <li>Defender for O365</li> <li>Defender for vulnerability</li> </ul>	<ul style="list-style-type: none"> <li>Prevent and block Threats</li> <li>Identify suspicious behavior</li> <li>Automated Self-healing</li> </ul>	<ul style="list-style-type: none"> <li>Cross Domain Threat Hunting</li> <li>Identify vulnerable assets and misconfigurations</li> <li>Narrate the full attack story</li> </ul>
 <p><b>MS ENTRA</b> IDENTITY AND ACCESS MANAGEMENT</p>	<ul style="list-style-type: none"> <li>Azure Active Directory Permissions</li> <li>Management Verified ID Workload identities</li> <li>Identity Governance</li> </ul>	<ul style="list-style-type: none"> <li>Secure Access</li> <li>Visibility and Verification, Permission management across multi-(Azure, AWS and GCP)</li> </ul>	<ul style="list-style-type: none"> <li>Identity Verification</li> <li>Identity governance</li> <li>Risk-based policies and enforcement of least privileged access.</li> </ul>

## BENEFITS OF M365 SECURITY

## INFOSYS M365 SECURITY SERVICE OFFERINGS

Infosys offers a comprehensive set of Management Consulting, Implementation, and Managed Services to secure a modern workplace using Microsoft solutions.

## OUR SUCCESS STORIES

### Integrated security for a leading Transportation and Logistics Company

Integrated security, compliance, and identity solutions for the company with Microsoft Security. The solution included Azure MFA, a Self-service password reset Portal, Defender for O365, AIP, and O365 DLP, and Microsoft Intune for Mobile Device and Application Management. The solution led to 25% reduction in service desk calls due to the enablement of Self-Service Password Reset; 30% cost savings by replacing disparate security products with Microsoft solutions and 40% Reduction in security and compliance-related incidents.

### A Europe Based Renewable Energy firm gets a secure Modern Workplace

A Modern Workplace solution was implemented for a Europe based Renewable Energy firm leveraging Microsoft Security. The EMS security and Threat protection solution was designed for over 23000 users with Azure Information Protection, Azure MFA, and Self-service password reset. MS advanced threat analytics for protecting the organization from advanced targeted cyber-attacks and insider threats. 40% reduction in the number of issues related to security and compliance; 30% cost saving per user per month and ensured secured access to Office 365 applications from the Internet.
