

Events, Membership and Committee Solution

Solution Overview:

The Event, Membership and Committee Solution is a unique business App for organisations which have a requirement to integrate the management of Events and Membership within D365.

Solution Features:

The Event Management Solution is comprised of four main functional areas:

- Event Management – Provides functionality to quickly and easily create and manage Event within D365.
- Membership Management – Create and manage all the different types of Membership you offer as products within D365.
- Committee Management – Allows documentation, scheduled meetings and knowledge to be shared with Committee members.
- Customer Portal – The Portal is the interface people can use to register for Events, Memberships and Committees.

Benefits Include:

What we Deliver

Customer Portal UI Branding

Customer Portal UI can be customised to provide seamless integration with your existing website.

SharePoint Integration

SharePoint will be used to store Event and Committee Documentation.

Security

Solution Security Roles to meet your security requirements.

Customized Email Templates

Emails will be automatically generated from the solution at specific points. All email templates used can be customised and branding added.
