THOUGHTSTORM

Azure Migration Consulting : Free Session
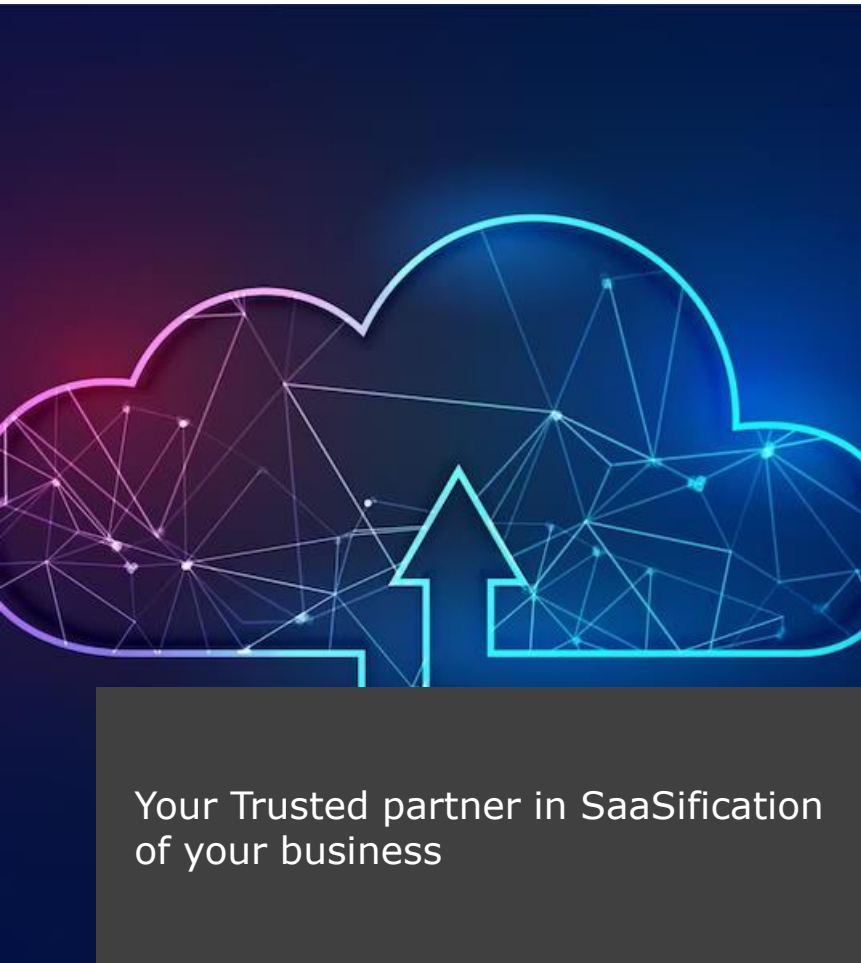

2-Hour Complementary Consulting Session from Azure certified ThoughtStorm expert to help you Plan, Strategize and Implement your Journey to Cloud.

- A cloud-based IT foundation assists businesses in becoming more cost-efficient, agile, and innovative.

- Our Cloud Migration Assessment Team will help in assessing the migration of workloads to the cloud, supported by comprehensive cloud migration planning services.

- It is important to assess the environment and focus on generating an effective, actionable migration plan to achieve this goal. Spending time to plan upfront is key to reduce risk and increase the likelihood of success of any Cloud migration project.

Your Trusted partner in SaaSification of your business

Journey to Cloud

Cloud Assessment
- Asses Cost
- Assess Architecture
- Assess Security

Proof of Concept
- Build Pilot

Data Migration
- Leverage Storage Options
- Migrate Data

Application Migration
- Migrate the application

Leverage Cloud
- Scale
- Automate
- Test
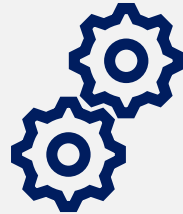

Optimization
- Monitor
- Redesign as required

The primary goal of any Cloud migration project is to transfer existing applications (or solitary VMs) from on-premises environment to the cloud, as quickly, efficiently, and cost-effectively as possible. considerations must include application and data dependencies, security controls, latency, subsequent performance, operations practice for backup/recovery, and others.

What we Offer

In this 2-hour complementary session, an Azure certified ThoughtStorm consultant will review cloud migration success parameters with you. We will spend 10-15 minutes each on discussing the following topics (suggested):

Mutual Introductions : ThoughtStorm and You

Understanding your Current Infrastructure

Business Agility and Optimization Impact

Budget and Cost Expectations

Cloud Migration Roadmap

Cloud Suitability : Analysis and Recommendation
