

Business Central Reporting Package

JOURNEYTEAM

Unleash your Microsoft Dynamics 365 Business Central Data Using Power BI

We believe that with the right reporting solution in place, anyone can turn their data into powerful insights. We understand that getting data out of Business Central can be complicated and time-consuming which is why we developed our Business Central Reporting Package. This reporting package helps take Business Central data and turn them into actionable insights so that you can focus your efforts on areas that make the biggest impact.

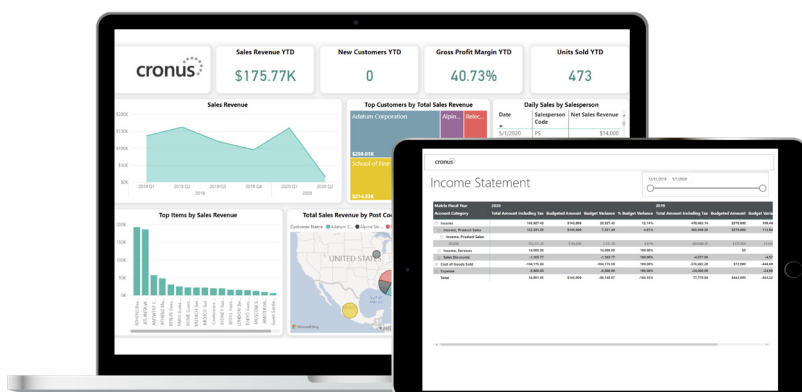

Design Your Own Custom Reports With Dynamics 365 Business Central

Getting started is simple. JourneyTEAM will install and configure the reporting package for your unique setup. After that, you'll gain instant access to in-depth reports and insights.

Business Value Delivered

- Access to the underlying dataset so that you can build your own reports.
- Easily access your Dynamics 365 Business Central data.
- Make quicker decisions without having to make time-consuming investigations into the data.
- Multiple pre-built report pages covering your financial, inventory, and sales data.
- Have both high-level and granular insights into your data.
- Interact more easily with your data via quick actions such as:
 - Filtering to answer specific questions.
 - Highlighting what's most important for your business.
 - Cross-filtering to compare against other metrics.
 - Drilling down into details and more.

Cost: Basic implementation starts at \$7,995; additional customization available at an hourly rate.
