# Microsoft Power Platform Center of Excellence (COE) Implementation

*Supporting citizen developers in your organization can lead to increased innovation, faster time-to-market for applications, and greater employee engagement, as well as potentially reducing the burden on IT teams.*

A Microsoft Power Platform Center of Excellence (CoE) streamlines and standardizes tool usage, improves productivity and data analysis, and enhances collaboration. It also improves data security, reduces errors, and informs future updates. A CoE helps maximize the value of investments in Power Platform tools, leading to better business outcomes and increased competitiveness.

Our approach enables organizations to  streamline and standardize the use of these tools across the business.

**Security, administration & Governance**
> Managing security and data loss prevention with conditional access, and continuous monitoring

**Drive efficiency with automation**
> Enabling business users to build solutions, supporting them with operational readiness, and ensuring best practice adoption to scale

**Support & inspire**
> Empowering citizen developers to innovate by sharing the art of the possible, driving reusability, and providing lifecycle support

# Why partner with TrnDigital

**TrnDigital**

TrnDigital develops leading-edge technology solutions to help solve business problems and create new commercial opportunities

Our experts have executed countless successful projects and we offer cost-effective solutions for both small and large organizations. We aim to eliminate waste at every step by driving clarity in business objectives and utilizing proven methodology together with unique IP. TrnDigital empowers clients to transform into the digital landscape and stay ahead of the competition.

## Large Pharmaceutical Company Case

### Business Challenge

The client had fragmented citizen developer process across business functions, no central repository of applications, and limited resources to develop a Microsoft Power Platform Center of Excellence

### Solution Highlights

We first gathered telemetry for visibility into the existing landscape; Then established governance and guardrails, create a curated app catalog, and provide art of the possible training to key stakeholders. We drove community support with a Microsoft Teams site and meaningful content.

### Customer Benefits

The customer IT department could benefit from citizen developer innovation and efficiency while ensuring they could scale to meet demand. Unused applications and resources were cleaned up while end users were empowered with learning materials and support.

**Speed of development within the organization – having tangible working prototypes changed from weeks to days.**

Our scaled engagement model enables us to support organizations of any size - from startup to enterprise - with predictability and rigor.
