

DevOps Services

Uniting technology, process, metrics & culture to deliver faster & higher-quality software products

Today's world of continuous change demands that we deliver more on shorter time horizons, and flexibly adapt to realtime changes in the competitive landscape. Our agile DevOps and Continuous Engineering services shorten development cycles, increase deployment frequencies, and deliver robust, dependable releases to improve your application's time to market, visibility, and growth.

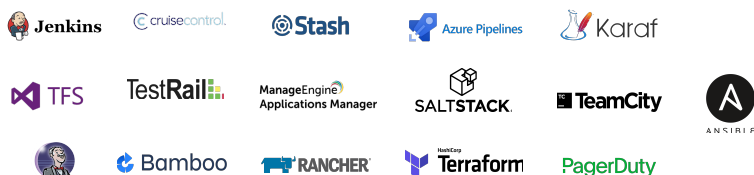

Encora's Technical Center of Excellence: DevOps

- Implement full suite of DevOps best practices & metrics
- Integrate security & compliance into pipelines through DevSecOps
- Deploy optimal DevOps toolchain to minimize overlap, conflict & functionality gaps
- Augment toolchain with Release Orchestration & Performance Monitoring tools
- Architect self-service platform for developers, tailored to the needs of the organization

Use Cases

- Deployment of end-to-end integrated DevOps platform with best-in-class components
- Integration of security, compliance, authentication & authorization into DevOps
- Customized low-code DevOps automation for low & medium complexity workflows
- Implementation of Value Stream Management as a core function of DevOps

Expert Profile

Isac Souza

Innovation Leader,
DevOps

"DevOps for our delivery practice is not just automation, it is an investment that teams at Encora make at an early stage. Encora employs the DevOps practice to utilize infrastructure effectively, automate activities, and reduce cost of quality. Earlier adoption helps us scale deliveries to higher deployment/change frequency, increase mobility of workload with zero downtime while keeping the failure rate in check. Our delivery practices transfer the benefit of DevOps initiatives to our customers providing value for investment."

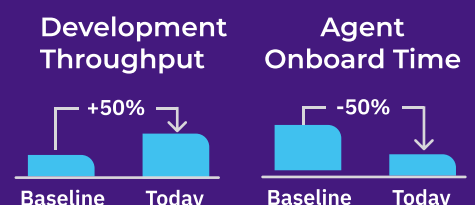

Client Testimonial

"We trust high business-value projects to Encora because we know this amazing team comes through for us"

Digital Commerce Client
Sr Director, Global Engineering

Client Impacts Digital Commerce Client

Streamlined client's core APIs to GDS connectors, refactoring legacy code, introducing new microservice fabric & robust DevOps practices to accelerate the pace of new releases.

Company Overview

Encora is the digital engineering services partner of choice for some of the world's leading technology companies

Mission to accelerate business outcomes for leading-edge technology clients through superior digital product innovation

Technical expertise in Cloud, Product Engineering, Machine Learning, Digital Experience, UI/UX, Data Science & Engineering and DevOps

Backed by leading Private Equity firms Advent International
