

# CloudClass

**Your digital connected class in the cloud.  
Modern scalable solutions for the cloud connected school.  
Native integration with Microsoft Cloud technology**

Calendar

Evaluations

Tracking

CloudClass offers a cloud dashboard for schools to augment the Microsoft solutions with education specific features like:

- A school diary with class subjects and MS Teams / Outlook integration.
- A competency based evaluation system with MS Teams Assignments integration.
- A presence log to collect and report student presence (and integration with gov).
- A student tracking system with integration with all the above tools.

For school IT Admins the CloudClass platform can also be used to provision the M365 environment with student and teacher accounts, Teams groups and all the needed configuration to manage the cloud usage of Microsoft tools.

Pricing starts with a free basic platform.

After this first initialisation and usage a school can decide to add paid modules as the needs grow inside the school. Pricing is calculated on a per-student basis so you only pay for what you use.

Artificial intelligence and educational insights in the student learning process will be added in the future to give the school indicative alerts when students drop out.

Parental contact planning with MS Bookings integration is in development and will be launched in the near future.

# CloudClass Pricing

## Student Tracking

A student tracking system with superpowers! Create incidents for a student or group of students and add other teachers for follow-up. If you have other modules, you can link evaluations, goals, attendances or teaching moments to an item.

## Evaluations

A modern evaluation system for the school of tomorrow. Evaluate by grades, or pass / fail. Link goals to an evaluation to track which student has achieved which goals. Integrates with Microsoft Teams for an ideal workflow during class.

## Attendances

Keep track of who is present in class. CloudClass automatically forwards this to the government as required. View statistics per student to track attendance.

## School diary

A flexible module for scheduling teaching moments for your students. Link goals to these teaching moments to clearly communicate what the lesson will be about.
