AZURE VIRTUAL DESKTOP SOLUTIONS

The ability to continue work regardless of location can be a critical advantage (or just critical)! The challenge is how to enable your workers, protect them, and keep your assets safe!

WORK IS WHAT YOU DO, NOT WHERE YOU ARE

The only Windows 10/11 Multi-Session Experience is on Azure

Access the fully managed, always up to date, rich Windows user experience from any end-user device platform with your choice of virtualized OS. You have complete access control for security and cost efficiencies.
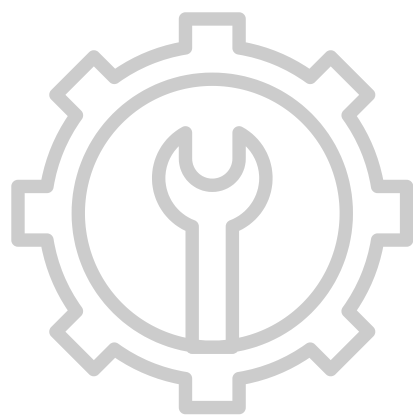

DEPLOY AND SCALE IN MINUTES

Manage users and security via a unified administrative interface in the Azure Portal. Use familiar tools and like Rest API & Powershell to customize setup, deployment, and UI. Dynamically scale virtual machines using depth-first or breadth-first load balancing. Benefit from the integrated security and management of Microsoft 365 and rich partner solutions.

MIGRATE RDS IMAGES

Bring existing Remote Desktop Services (RDS) and Windows Server desktops and apps to any computer. Reduce costs through unified management and deployment experience for Windows Server and Windows 10/11 desktops and apps.

OPTIMIZED FOR MICROSOFT 365 WORKLOADS

Deliver the best Office 365 ProPlus experience in a multi-session environment to your users with container technology. Virtualize entire desktop or select applications only.

together we make IT happen

Is AZURE VIRTUAL DESKTOP for you?

- You need the ability to add users quickly and easily
- You need to scale efficiently on demand
- Your end-users need a seamless rich client experience with Outlook, Search, Cortana, OneDrive, and Teams
- You need to manage different deployment types across different deployment planes
- You need to bring Remote Desktop Services (RDS) to your users

- You need to support both persistent and non-persistent environment
- You need integrated security and management (e.g. Microsoft 365, AAD)
- You are in a regulated industry and need to meet strict compliance requirements
- Your virtual desktop journey requires reuse of existing investments (e.g. Citrix)
- You want to reduce management and deployment costs for Windows Server

YOU MAY ALREADY HAVE ACCESS...
