

Azure Arc Innovation Workshop

Azure Arc brings Azure security and cloud-native services to hybrid and multi-cloud environments. It enables you to secure and govern infrastructure and apps anywhere, build cloud-native apps faster with familiar tools and services to run them on any Kubernetes platform, and modernize your data estate with Azure data and machine-learning services.

Business Focused Outcomes

- Reduce complexity & maximize ROI of technology investments
- Ensure your infrastructure, applications and data platforms are “Future Ready”
- Unlock innovation with faster time-to-value and orchestration capabilities

Cognizant’s Azure Arc Approach

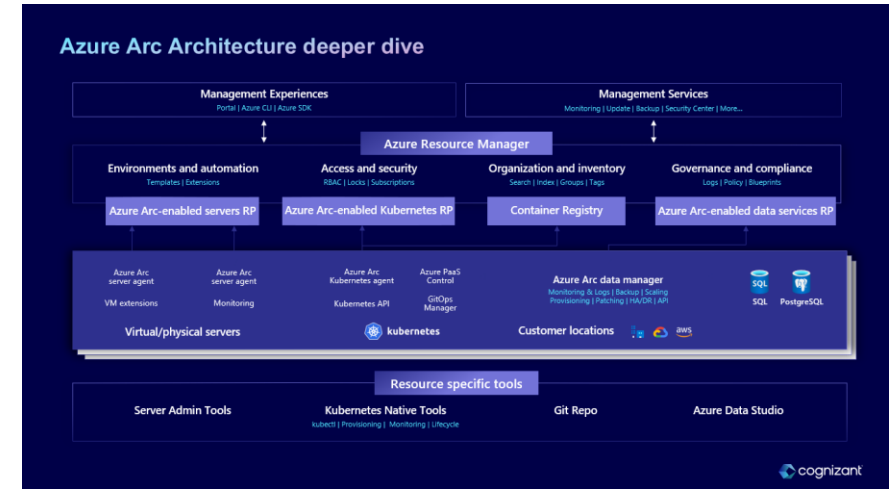

- Structured, iterative and effective methodology and approach
- Powered by the 10vū™ transformation platform and Drivetrain™ orchestration engine
- Cloud Adoption Framework aligned
- Delivered by a team of Microsoft Azure experts committed to your success

“ Azure Arc simplifies governance and management by delivering a consistent multi-cloud and on-premises management platform ”

Microsoft

CONSOLIDATE AND SIMPLIFY THE MANAGEMENT, GOVERNANCE AND SECURITY OF YOUR ENTIRE IT ESTATE – ON ALL PLATFORMS

Azure Arc Innovation Workshop Overview:

An interactive and engaging workshop to create your MVP hybrid infrastructure environment with a common management layer.

Following an initial suitability assessment of your current application / environment, the next step is to quickly establish a Azure Arc enable landing zone that provides the centralised management, governance and security capabilities for your hybrid infrastructure environments.

This engagement lasts between 5 and 8 weeks depending on the flavor of hybrid resources are being onboarded.
