Solution Brief

Enterprise Integration Accelerator With Insight Path

Business challenge

A fully integrated technology infrastructure is critical to success in leveraging organizational agility and flexibility to meet the increasingly rapid demands of an organization to innovate and stay competitive. However, as businesses evolve, processes and technology often become siloed across multiple platforms and environments, leading to inconsistent data and the inability to provide a fully integrated business view.

Traditional integration solutions focus on governance and have a limited ability to serve agile business requirements that need accelerated time to market. Running an Integration Assessment sets a pathway for organizations to champion business agility through an integrated infrastructure and single source of business truth.

How we help

This seven-week accelerator will address key security, governance, cost control and operational requirements through a series of collaborative workshops, knowledge transfer, infrastructure as code and a DevOps-ready implementation framework. We will leverage our Insight Path™ accelerator, an Insight-built platform that extends your enterprise-scale Landing Zone, to bring your Azure® Integration Landing Zone from zero to one in as little as two weeks.

This offering will provide you with the following deliverables:

- Assessment of current integration ecosystem and selection of up to two service integrations to be modernized
- Enablement workshops with your integration development and infrastructure team
- Configuration of Azure DevOps build-and-deploy pipelines and prerequisites
- Configuration and deployment of Azure Integration Services resources based on Azure Blueprints to nonproduction and production environments
- Selected legacy integration service code remediated as Azure Integration Services
- Azure Integration Services deployed and validated in nonproduction and production environments

Duration
7 weeks

Benefits

+ **Gain the value multiplier of your investments that is already made** in or planned for a Cloud Adoption Framework with Azure.

+ **Identify key assets** that are important for business success.

+ **Create a strategy** to address redundant manual processes.

+ **Prioritize initiatives** that will enable benefits from your integration portfolio.

+ **Understand the benefits** of Azure Integration Services.

Accelerator approach and activities

Insight's team of integration experts will deliver the foundational framework for repeatable best practice Azure Integration Services.

Analysis & design	Implementation

• Project kick-off
• Assess and migrate report evaluating the application integration ecosystem to validate cloud migration feasibility
• Workshop sessions to discuss current client environment and requirements and preferred target state related to:
  ▪ Solution deep dive to gather architectural requirements
  ▪ Deliver best practices
  ▪ Operations: monitoring, logging and telemetry
  ▪ Solution security
• Creation of solution architecture document based on workshop outcomes
	• Configuration of Azure DevOps build and deployment pipelines and prerequisites
	• Template-driven configuration and deployment of cloud integration platform resources
	• Establish end-to-end integration and connectivity between services
	• Validate permissions and access controls
	• Demonstration of end-to-end integration within a production-ready environment

Insight Path: Our differentiated accelerator

Insight Path accelerates time to value for your integration initiative:

• Provides a scaled-out and mature environment
• Automates best practices for environment design
• Includes a strong foundation for management, governance and security processes
• Implements an integration platform for complex cloud 3.0 scenarios
• Builds toward the target end state for most organizations

Recent client outcome

Automotive services company

A 100+-year-old company required real-time integration of on-premises and cloud systems, including TIBCO Enterprise Integration Bus supporting 120+ services, which was costly and difficult to manage.

Insight's platform provided a cloud-first strategy to service more than one million customers and helped deliver integrations for business processes, automated builds and processes, financial and product transactions, internal apps and a chatbot.

Getting started is easy.

Driving innovation with digital transformation

At Insight, we help clients enable innovation with an approach that spans people, processes and technologies. We believe the best path to digital transformation is integrative, responsive and proactively aligned to industry demands. Our client-focused approach delivers best-fit solutions across a scope of services, including the modern workplace, modern applications, modern infrastructures, the intelligent edge, cybersecurity, and data and AI.
