

Azure Kubernetes Service (AKS)

PD rate € 1.200

Are you running containerized business workloads or are you on the verge of adapting to containerized workloads? Are you fed up with difficult sizing decisions in regard to your container platform or are you facing a new hardware lifecycle? Are you struggling to get a proficient team to implement, adapt and operate your container environment?

If you can check any of those boxes above, you might want to look into managed **Azure Kubernetes Service (AKS)** implemented and/or operated by EBCONT - a trusted Microsoft partner.

Why should you have a look into this?

- ✓ **Managed hardware** (no lifecycle management, no procurement and no hardware failure mitigation strategies)
- ✓ **Fully managed service** with flexibility where you need it
- ✓ **Hardware Sizing**, on demand (Auto)Scaling, Integration with common build and deployment pipeline (e.g. GitHub, Azure DevOps), Advanced Governance features (including granular IAM), High availability and high resilience environments, Staged environments, Seamless integration of Azure Cloud native services, High operational visibility of your workloads, etc.
- ✓ **High availability and high resilience environments**, Staged environments, Seamless integration of Azure Cloud native services, High operational visibility of your workloads, etc.
- ✓ **Architecture and implementation consulting** by EBCONT (optional)
- ✓ **Proficient truly fully managed service** operated by a team of specialists at EBCONT

Why should you contact EBCONT for this?

Trusted Microsoft partner with more than **20 years of experience** in IT consulting services
