About our Service
# Azure CosmosDB Consulting

Azure Cosmos DB is a NoSQL database service which is horizontally scalable and globally distributed. At Dotsquares, we help large and mid-size companies with database best practices, development, performance tuning, consulting, recruiting services and hands-on training services. Our team consists of certified Azure and Cosmos DB specialists.

Overview

Azure Cosmos DB is a NoSQL database service that is designed to provide high scalability, low latency, and high availability. It is a globally distributed database that is able to store and replicate data across multiple regions and data centers in Azure.

Benefits your business can leverage…

Reduced Latency

Multi-API support

Multi-Model Database
