About our Service
Azure DevOps Consulting

Dotsquares is providing best DevOps consulting services to your business and specialized in optimizing technological development cycles on Microsoft Azure. We aim to provide the customers with the expertise and capabilities.
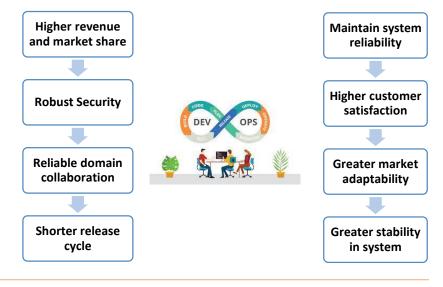

WHAT WE OFFER?

We are providing DevOps consulting services tailored to your specific project requirements. Our offerings include:

- Identifying and analyzing the need for application lifecycle management.
- Conducting a cloud native assessment to assess the customer's level of maturity in various areas such as DevOps, infrastructure, agile application architecture, test automation and security.
- Training and supporting the development and implementation process, which includes training.
- Executing the implementation of either all or part of the Cloud Native Applications using DevOps as a primary approach.
