Simple DMARC Securing your email domain with ease.

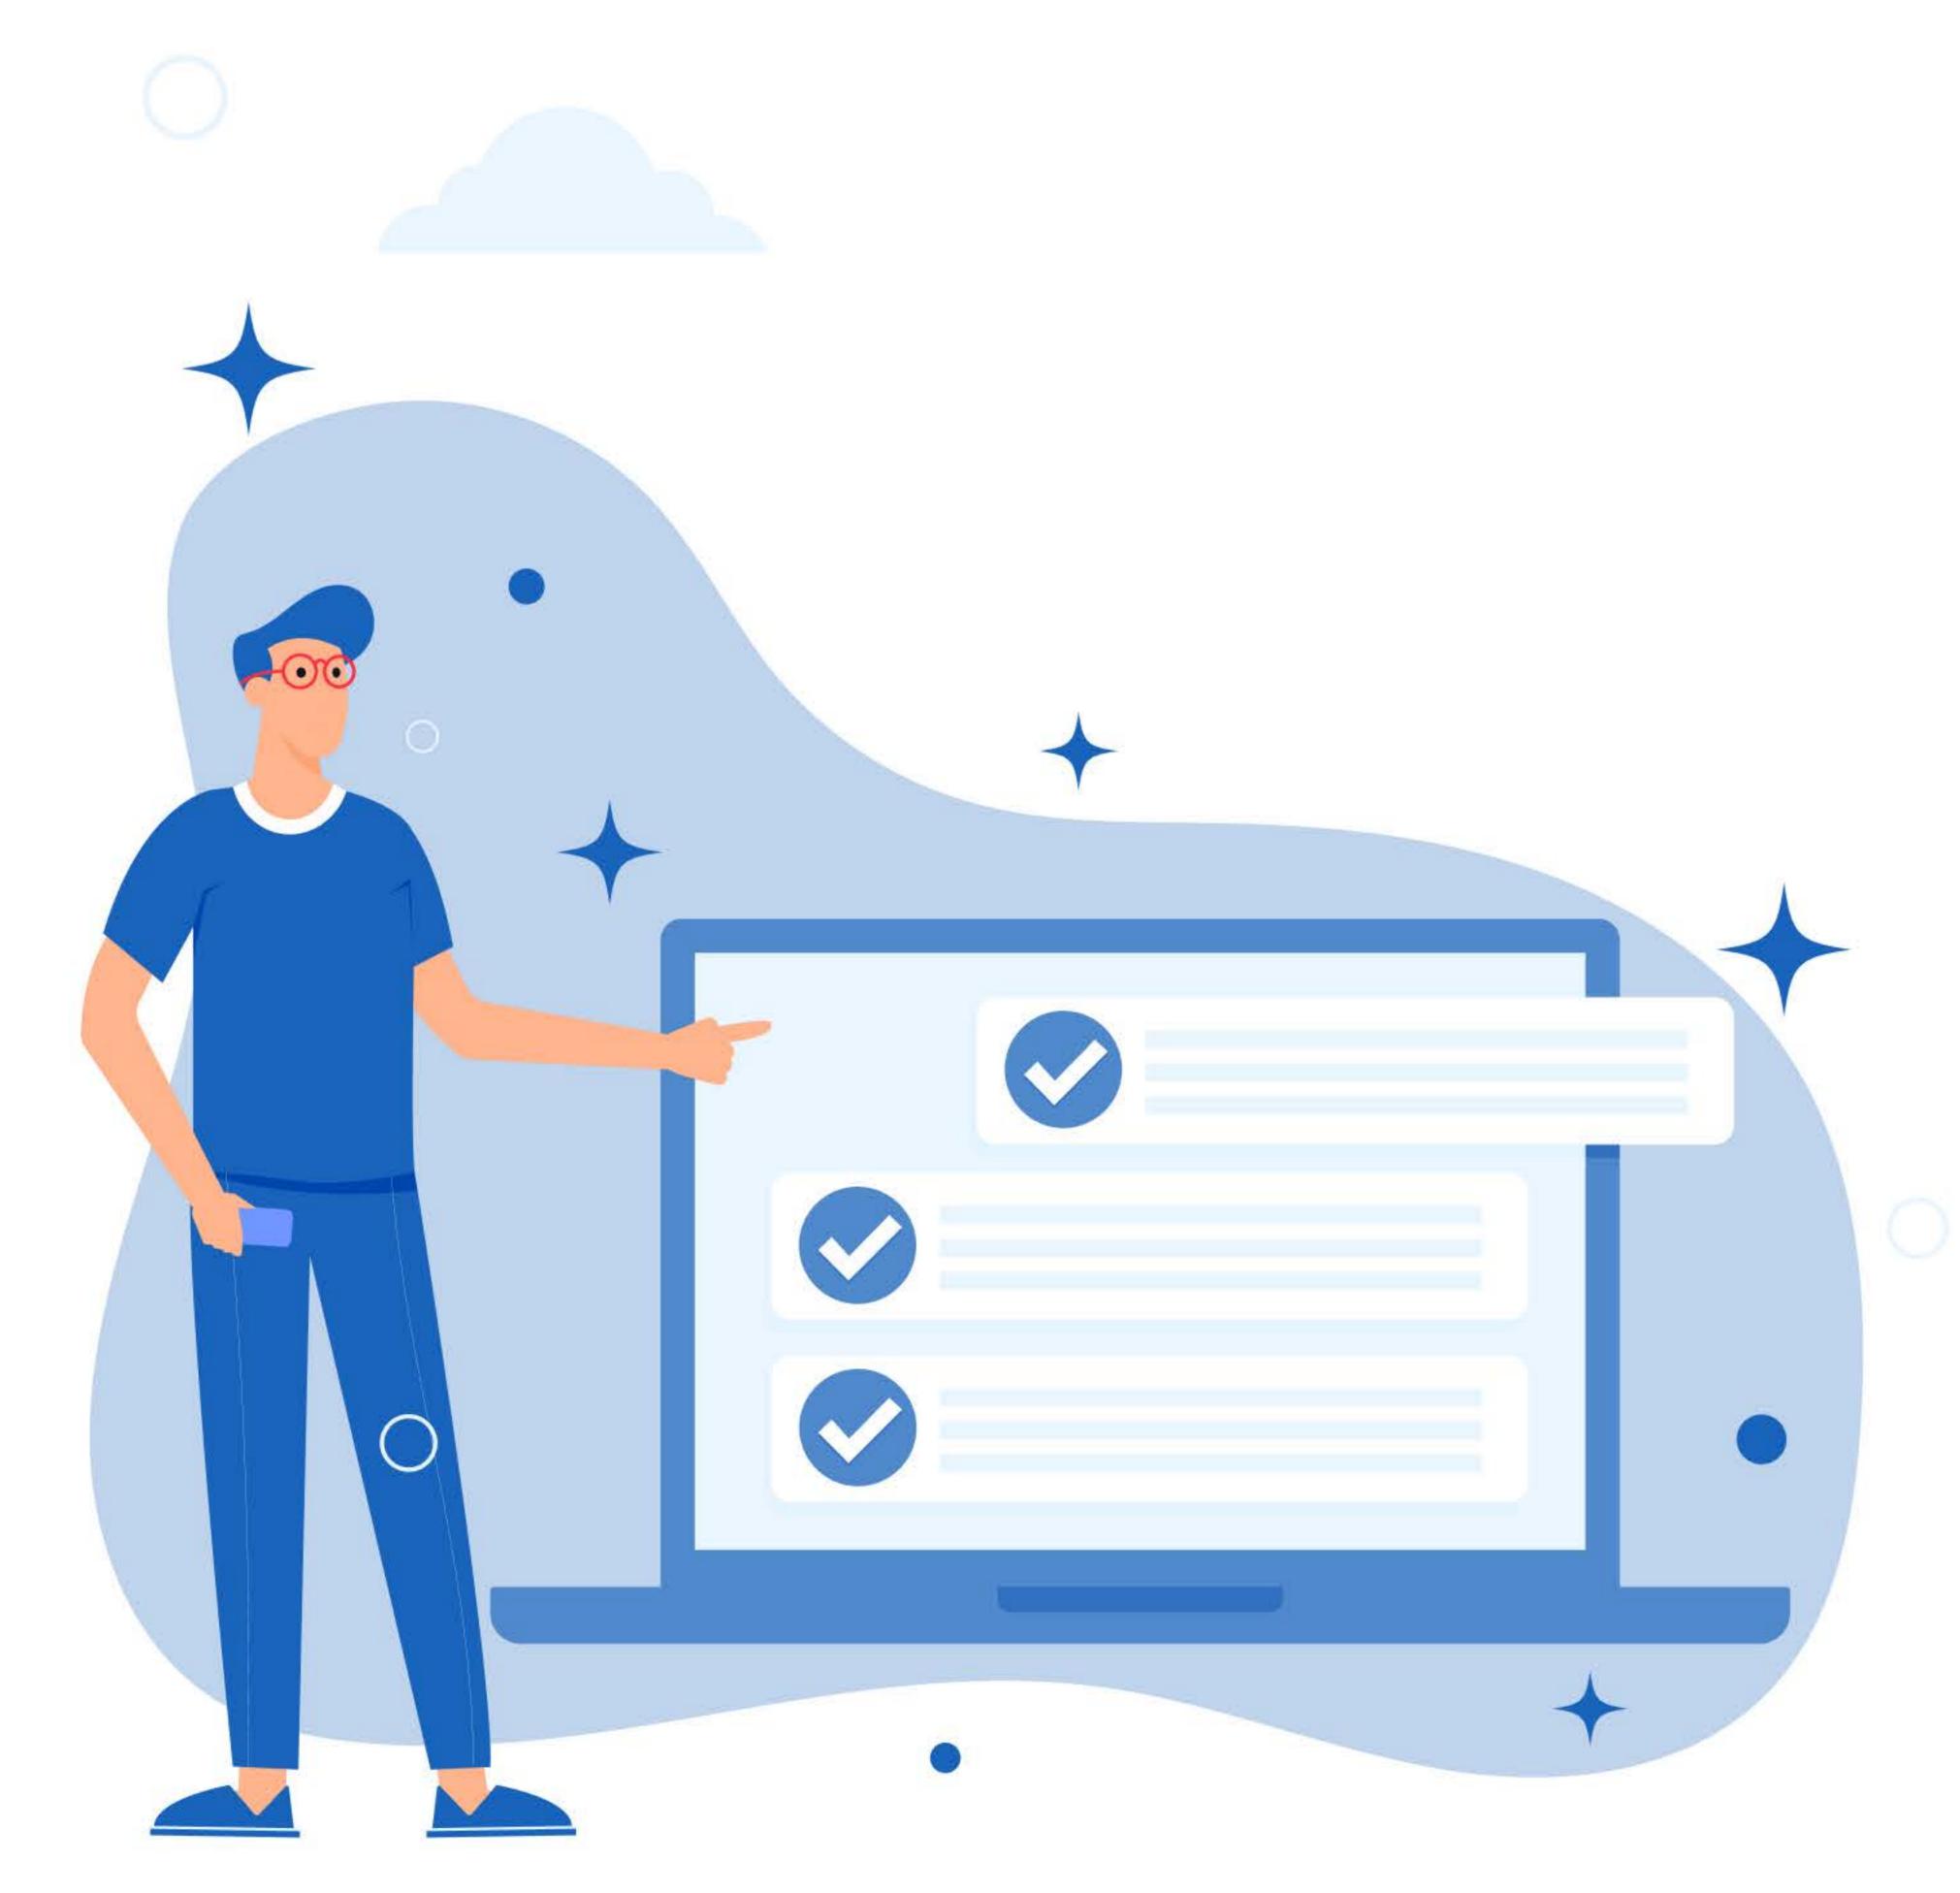

## About us

Simple DMARC is a leading provider of email authentication and security solutions.

- We have a team of experts who are dedicated to ensuring that your email domain is protected from spoofing, phishing, and other types of attacks.
- Our mission is to make email security accessible to everyone, regardless of their technical expertise.

## Our Service:

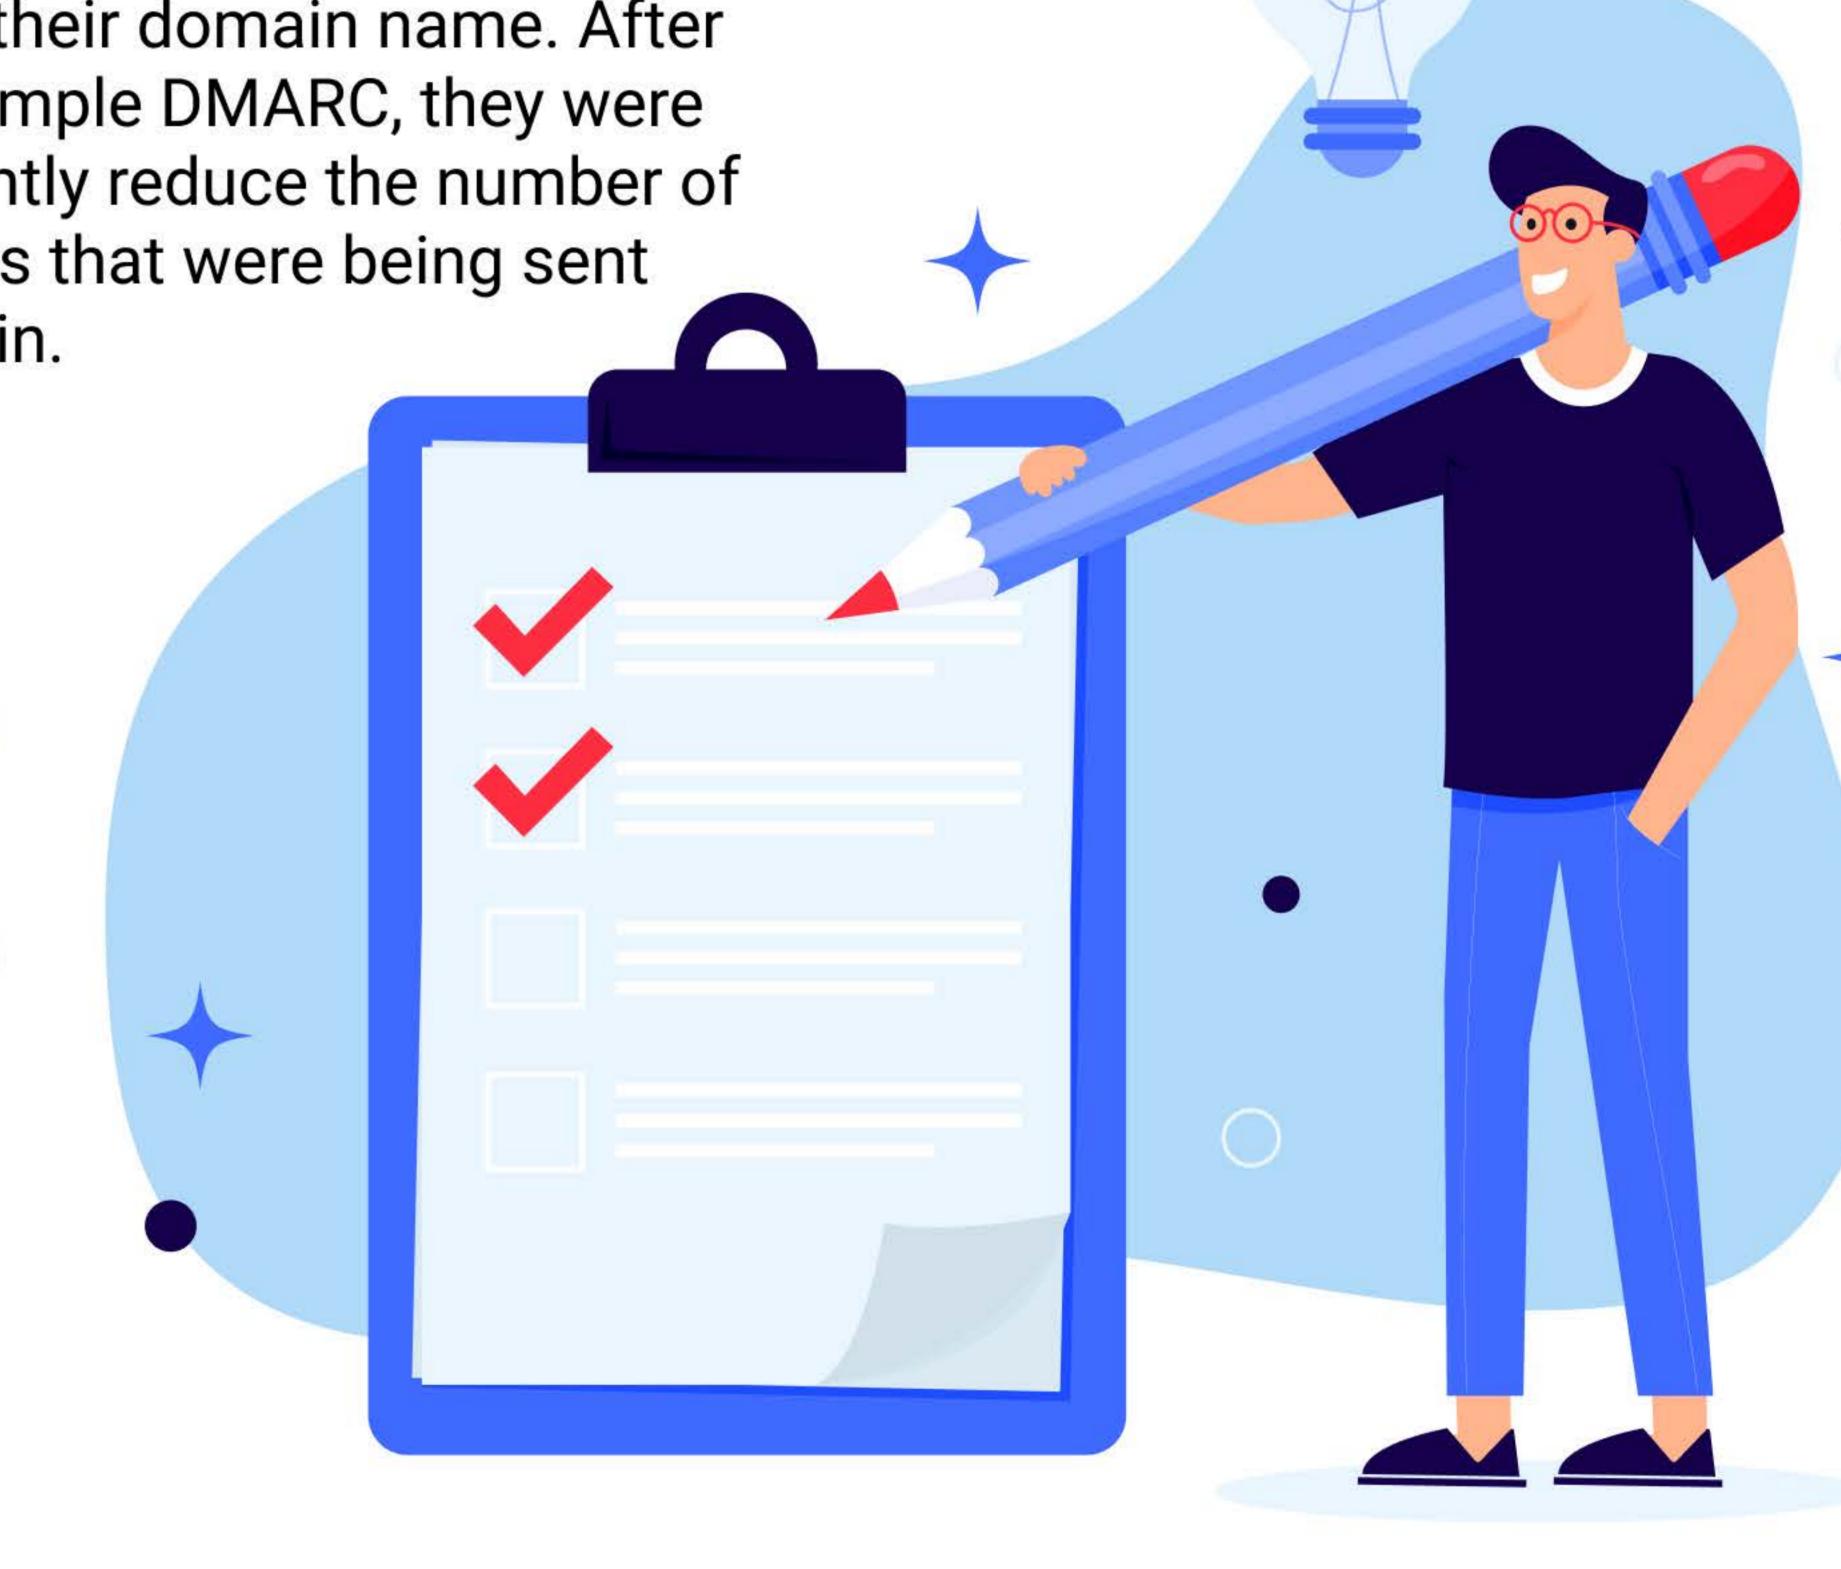

We provide a comprehensive email authentication solution that includes SPF, DKIM, and DMARC.

- Our service is designed to be easy to use, even for non-technical users.
- We offer a simple setup process, real-time reporting, and 24/7 support.
- With Simple DMARC, you can rest assured that your email domain is protected from unauthorized use.

## Case Study

One of our clients, a large financial institution, was experiencing a high volume of phishing attacks

that were using their domain name. After implementing Simple DMARC, they were able to significantly reduce the number of fraudulent emails that were being sent from their domain.

DMARC is an email authentication protocol that is designed to help organizations protect their email domains from unauthorized use.

It works by allowing domain owners to specify which email messages are authorized to use their domain name, and provides feedback to the domain owner about how their domain is being used.
