RSM'S GREENHOUSE GAS ADVISORY SERVICES

Prepare for Climate-Related Regulatory Disclosures and De-Carbonize your Business.

RSM works directly with our clients to guide them along their entire greenhouse gas ("GHG") journey, leveraging industry-leading practices, guidance, and frameworks to develop robust emissions inventories, prepare for disclosure and audit, and create strategies to contribute to global climate goals.

Make data-led decisions about your carbon reduction strategy and reach your net zero goals faster.

WHAT WE OFFER

RSM's GHG services are scalable and applicable to companies anywhere along their ESG journey and focus on four primary objectives: Plan, Develop, Manage, and Mature.

Plan: Design GHG inventory including timeline, baseline year, control approach, boundaries, and emissions sources in line with corporate objectives

Develop: Develop GHG calculation model with necessary emissions factors to calculate inventory with data collected from data owners

Manage: Identify and design necessary internal controls and leverage technology to increase efficiency and introduce data visualization capabilities

Mature: Develop strategic initiatives and action plans to reduce emissions in the near- and long-term

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.

Key use cases

Sales

Respond to changing business requirements with a flexible platform to rapidly create new solutions and ensure old solutions are never truly finished.

Service

Understand your customers better and respond more quickly by accessing internal and external relationship data.

Finance and operations

Increase your return on investment with Microsoft's agile and efficient cloud solution.

Talent

Extend your virtual team and coordinate faster with a consolidated view of team members, activities, and responsibilities.

Marketing

Gain end-to-end visibility by connecting data from external markets, social, and legacy sources.
