

# Builder.ai

# Get online in less than a day

Keep your revenue - we will never ask for a cut of your sales or charge additional fee

Own your customer data - Build customer loyalty and provide better customer service

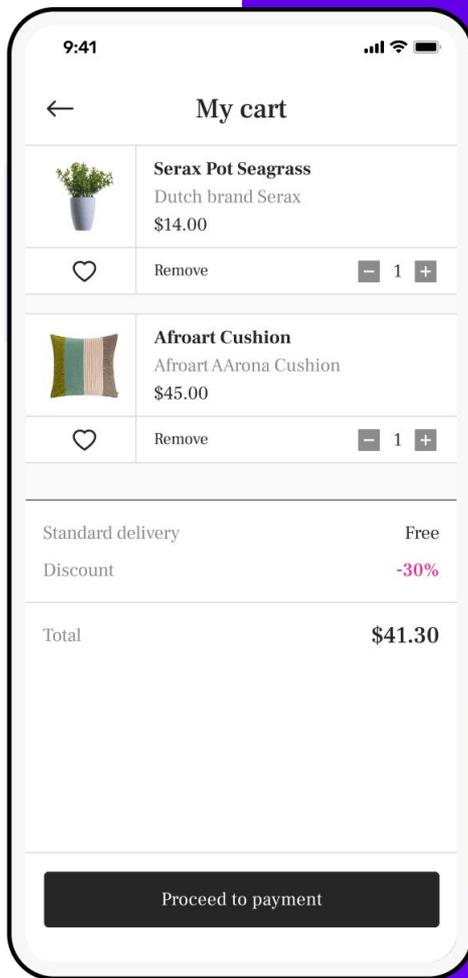

All essential features are bundled in; we include software maintenance and hosting as well

Your customers don't want to wait and neither should you.

Get your own  
website and  
both, iOS and  
Android apps

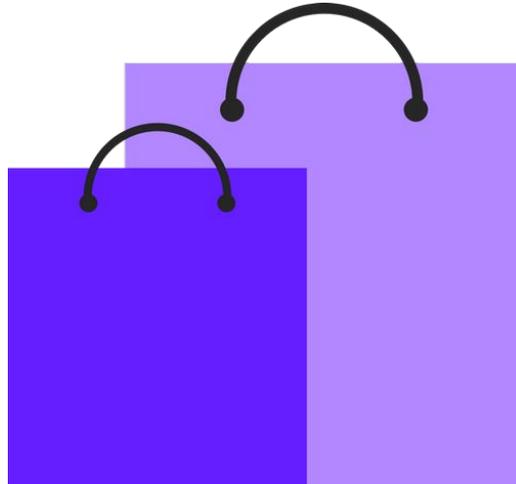

COVID accelerated the move from physical stores to ecommerce - In-app sales are growing 46% year-on-year.<sup>1</sup>

Your Shop-in-a-Box includes Website, iOS & Android apps with hosting, maintenance and third party services (payments, delivery) all bundled into one convenient package

The only branding customers see is yours.

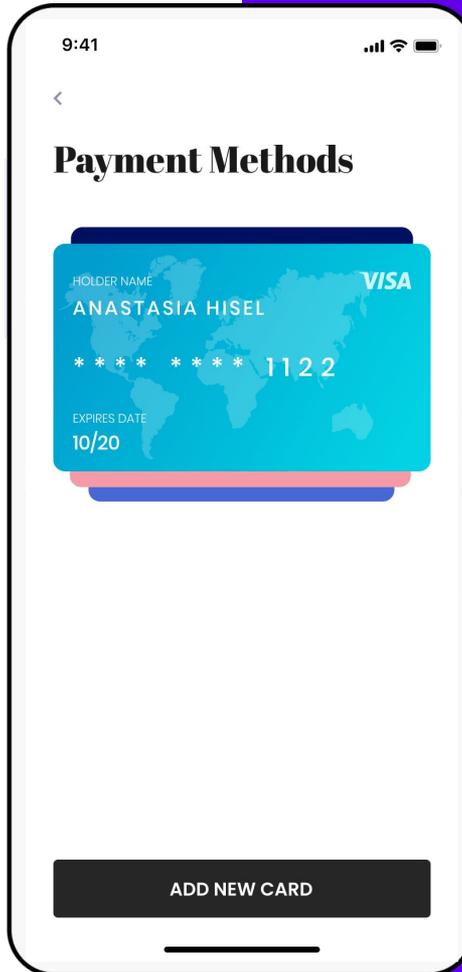

# Your customers get a better shopping experience

Showcase what you're selling in a beautiful catalogue, with a scrollable carousel.

Analytics and machine learning lets your store figure out which products customers want and display tailored recommendations in their feed.

and make **secure payments**

Once customers add items to their shopping cart, paying for them is simple and secure. And a payment gateway makes running the whole process effortless.

Get your customers to create a password-protected account for increased security. Automatically store their credit card details to make future purchases seamless.

# Your own app makes everything simple

Choose any delivery provider. Or build your own system and calculate delivery costs using our shipping charge calculator.

Up to date delivery information and SMS updates for customers to track delivery.

Manage your inventory with automatic updates - say goodbye to messy spreadsheets and days counting stock.

Collect valuable data to grow your business.
